Re: Water Licenses No. 18104 & 20237

Permit No. G-26834 - Earl Sallee

A. L. Blandford
Attorney at Law
Kimberly, Idaho

Dear Mr. Blandford:

Your letter of August 9, 1960 received in regard to the noted licenses and permit.

Permit No. G-26834 has a remark that the other two wells on the property would be abandoned if sufficient water was developed under the permit.

We believe that the Water Licenses can be cancelled or held for nought by the State Reclamation Engineer upon petition of the owners of such Water Licenses signed before a Notary Public. Proof of ownership should accompany the petitions, one petition for each Water License.

Or the Certificate of Completion of Works and Water License under Permit G-26834 can be issued for the amount produced by the well or at the rate of one miners inch per acre of irrigated land, which ever is least. The Water License would have the condition - "Not over one miners inch of subterranean water for each acre irrigated shall be diverted from all diversions for irrigation of the above described land" - or "Total amount of water diverted under Water Licenses 18104 and 20237 and G-26834 shall not be in excess of one miners inch of water for each acre of irrigated land."

Very truly yours,

GEO. N. CARTER

Permit No. G-26834 - Earl Salles

A. L. Blandford

Dear Mr. Blandford:

Your letter of August 9, 1960 received in regard to the noted licenses and permit.

Permit No. G-26834 was a remark that the other two wells on the property would be abandoned if sufficient water was developed under the permit.

We believe that the Water Licenses can be cancelled or held for nought by the State Reclamation Engineer upon petition of the owners of such Water Licenses signed before a Notary Public. Proof of ownership should accompany the petitions, one petition for each Water License.

Or the Certificate of Completion of Works and Water License under Permit G-26834 can be issued for the amount produced by the well or at the rate of one miners inch per acre of irrigated land, which ever is least. The Water License would have the condition - "Not over one miners inch of subterranean water for each acre irrigated shall be diverted from all diversions for irrigation of the above described land" - or "Total amount of water diverted under Water Licenses 18104 and 20237 and G-26834 shall not be in excess of one miners inch of water for each acre of irrigated land."

Dear Mr. Blandford:

Your letter of August 3, 1960 described a problem that is becoming general as more wells are drilled. The engineer's report does not show that the water from the wells was actually measured.

Some wells have been drilled deeper. In cases where the well has caved, permission has been granted to drill a new well in the near vicinity under the original permit, and retain the original priority. In one recent case a request for transfer in the point of diversion was requested. No protests were received after the legal notice and the request was approved. As far as we know, none of these cases have been decided by the District Court.

Licenses are issued with the provision that not over one miners inch per acre of irrigated land shall be diverted from subterranean sources.

Gentlemen:

Mr. Clyde E Edminster of this city has sold the following described property:

Lot 4 and SE 1/4 of the SW 1/4 of Section 19; E 1/2 of the NW 1/4 and W 1/2 of the NE 1/4 of Section 29; and Lots 1 and 2, and E 1/2 of the NW 1/4 of Section 30, Township 11 South, Range 19 East of the Boise Meridian.

In Completing this sale, Mr. Edminster feels that he must turn over the state water permits for water used in irrigating the above property. From the records in this county, we find that state permit No. 17834 for 3.2 cubic feet per second from artesian wells with priority from October 5, 1933 runs with the title to the property. Mr. Edminster also states that he received another water permit in 1948.

Mr. Edminster has neither of these water permits and accordingly has asked us to write to you in an attempt to obtain copies thereof. Will you please advise us as to what steps must be taken to obtain same. Your prompt attention to this request will be appreciated.

Dear Mr. Edminster:

This will acknowledge receipt of the deposition of the holder, depositions of two witnesses, and the affidavit of proof of publication from the Twin Falls News, all in connection with Beneficial Use proof under the above numbered permit.

Before final action can be taken in this matter, the law requires that a field examination be made by an engineer from this department. We are unable to say just when this examination will be made, since this department has but one field engineer, who makes examinations all over the State.

However, Mr. Tolman, field engineer for the Department, will try and contact you at the time set for examination, so that you may arrange to show him over the grounds.

When the engineer's report is filed, you will be notified of the amount due for the Beneficial Use proof and upon receipt of your check a license will be issued.

Very truly yours,

Dear Sir: Re: Permit No. 18104, Clyde E. Edminster

In the matter of proof of application of water to beneficial use under the above numbered permit, I inclose affidavit of publication of the notice of proof, deposition of the permit holder, and the depositions of two witnesses.

I do not remit your fees at this time, as I am doubtful as to your interpretation of the statute I.C.A. 41-215.

In the first place, the right sought is additional to an existing water right, and the statute hints that in such case no examination fee is charged.

In the second place, the irrigated acreage is 151 acres out of approximately 180 gross acres, there being three full forties and three twenty-acre lots in the property, and if a fee is chargeable I do not know whether it should be \$12.00, \$10.00, or \$8.00.

Please advise me what to remit in the way of fees.

Very truly yours,

We inclose notice of intention to make proof of beneficial use under the above permit number, together with the permit holder's authority for publication of notice in the Twin Falls News.

There are two blanks in the notice. The first is the date on which proof will be offered. Please make that date any day of the week following the four-week publication of notice. The second blank is the priority date. We do not have the application before us, therefore do not know what priority originally accrued, and until the date of proof is set we would not know what amendment is necessary on account of the delay in proof. Please do the figuring for us, and enter the priority date that is proper under the circumstances.

Would appreciate your checking over the notice for any inaccuracies.

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Clyde E. Edminster,
Hansen, Idaho

Boise, Idaho, **March 8, 1940**

Dear Sir:—

Under the terms of your permit No. 18104 you are required to complete your diversion works on or before May 13, 1940. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

JAMES SPOTFORD

Commissioner of Reclamation.

Permit No. 18104

Application for Extension of Time FOR COMPLETION OF WORKS

Clyde E. Edminster of Hansen,
State of Idaho, being first duly sworn, upon his oath deposes and says:

He is the owner and holder of Permit to Appropriate the Public Waters of the State of Idaho
No. 18104

Under the terms and conditions of said permit, construction work thereunder was required to be
completed by May 13, 1936.

That he has heretofore performed the following work described under said permit:
In order to make available for irrigation and domestic purposes the
subterranean waters underlying Permit Holder's lands and premises he
~~has sunk or drilled a well of the following dimensions:~~ First 100
feet 13 inches in diameter, next 110 feet 10 inches in diameter, next
730 feet 8 inches in diameter. The first 100 feet has been cased with
~~12 inch iron casing, the next 110 feet has been cased with 8 inch~~
casing, and 276 feet of 6 inch casing located in the lower segment
of well. The aggregate cost thereof is, \$3300.00.
costing \$

THAT he is unable to complete the remainder of the work within the required time, for the fol-
lowing reasons, to-wit:

- 1.-Inability to finance cost of further construction and completion
of works prior to May 13, 1936;
- 2.-Inability to locate in southern Idaho an efficient well driller
who is qualified to sink or drill well into artesian basin.

WHEREFORE, He asks that the Commissioner of Reclamation extend the time for the com-
pletion of construction work under said permit, to May 13, 1940.

Dear Sir -

I am writing you in
regard to an extension of time
on Permit no. 18104. I am afraid
I won't be able to finish my Artesian
Well before the time expires and would
like an extension.

Yours Respectfully.

Mr. R. W. Faris,
Commissioner of Reclamation,
Boise, Idaho.

Dear Sir:

Enclosed is application for permit to appropriate public waters made by Clyde E. Edminster. We also enclose our check for \$5.75 to cover the filing fee.

Mr. Edminster is sinking a well to obtain subterranean waters and heretofore filed an application upon which Permit No. 17834 was issued. The time for completing the works expired before Edminster struck water. He is going to have to sink the well deeper. The enclosed application is the same as the application upon which Permit No. 17834 was granted except for some slight changes to meet the facts.

If you find the application in proper form, issue a permit and when recorded return to us.

Yours very truly,

WALTERS, PARRY AND THOMAN
