RE: Permits Nos. R-760 & R-831

Twin Falls Times-News
Twin Falls

Gentlemen:

We have checked the notices appearing in your issue of March 29th, in connection with the above numbered permits of William T. Williams and note the following correction to be made in the land description as contained in paragraph 5 on Permit No. R-831. In the second line there should be a comma between NW $\frac{1}{4}$ and SW $\frac{1}{4}$. You realize this makes quite a difference in the description and please be sure to make the correction in your subsequent issues.

We also note that you have named E. L. Rayborn as the Notary Public instead of Roy Smith as in the notice sent you, but we assume that you were instructed to make this change by Mr. Williams.

Very truly yours,

RE: Permit No. R-760

Mr. William T. Williams
Route 2
Twin Falls, Idaho

Dear Mr. Williams:

We have filed the depositions of yourself and two witnesses in proof of completion of works on Permit No. R-760.

Although Mr. Humphrey made an informal inspection of this project last summer, before Certificate of Completion of Works is issued we shall require a more complete inspection and report, after which we shall write you in regard to fees in connection with issuance of Certificate of Completion of Works.

Very truly yours,

INSTRUCTIONS

PROOF OF COMPLETION OF WORKS

Mr. William T. Williams
Route 2
Twin Falls, Idaho

Boise, Idaho **April 2, 1951**

Dear Sir:-

Under the terms of your permit No. ~~R-760~~-----you are required to complete your diversion works on or before---~~June 5, 1951~~----- I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

MARK R. KULP

Dear Mr. Williams:

We acknowledge receipt of your two letters of June 17th, the one enclosing relinquishment of your Permits Nos. R-695 and R-701.

In regard to Permit No. R-760, we have no record of any plans or specifications having been approved on the reservoir described in this permit, nor have we received any request for a waiver of this requirement.

Re: Permit No. R-760

Dear Mr. Kulp:

Letter June 11, 1946 advises me that, "before work is commenced, it will be necessary to have the plans and specifications submitted to this department for approval."

The above permit is substituted for Permits No. R-695 and No-701. Your engineer was on the premises with John E. Hayes, engineer who resides at Twin Falls, Idaho, and myself, and I think this reservoir was gone over by your engineer at this time, and possibly will obviate the necessity for further specifications. As I recall you received maps, blue prints, of the works at that time.

Please advise me whether these maps and prints will suffice your purpose or whether we will be required to start as if previous permits had never been issued. As I recall this inspection by your engineer was upon Permit No. R-701.

At this visit by your engineer three reservoir sites were inspected by him and were designated as Williams No. 1, Williams No. 2, and Williams No. 3 Reservoir Sites. What is now Permit R-760 is the same as was indicated as Williams No. 2.

I want to get this matter cleared up in a definite way as I expect to begin active work toward completion.

Thanking you for your answer, which you may send duplicate to S. T. Hamilton, I am,

Very truly yours,

Dear Mr. Hamilton:

We enclose herewith Permit No. R-760, in the name of Mr. William T. Williams, together with duplicate copy thereof.

You will note that before work is commenced, it will be necessary to have the plans and specifications submitted to this Department for approval.

Also- inasmuch as this Permit states that there are no other water rights for this land except a short water right in the Salmon Falls Canal- it is necessary that Mr. Williams' relinquishment of his former reservoir permits Nos. R-695 and R-701 be sent in promptly for recording.

Dear Mr. Hamilton:

We do not seem to have received a reply to office letter addressed you on April 1st, in regard to the application of Mr. William T. Williams, sent us from your office, for reservoir permit on McMullen Creek.

As the statutory limitation of sixty days within which to complete or correct a permit application will expire June 1st, we are again bringing the matter to your attention.

Dear Mr. Hamilton:

We acknowledge receipt of your letter of March 29th, enclosing the application of Wm. T. Williams for permit to construct a reservoir and store 350 acre feet of water from McCallum Creek, together with your check for the \$5.25 filing fee.

We assume that this application is intended to take the place of Permits Nos. R-695 and R-701, also in the name of Wm. T. Williams, and for use on the same land, on which completion of works proofs are past due. If such is the case, will you please have the enclosed forms of Relinquishment executed by Mr. Williams, and returned to this Department, in order to clear our records.

The new forms of application for permit contain the question, "State existing water rights and/or valid permits appurtenant to the lands to be irrigated", which was not in the old forms. Will you please advise us as to any such rights appurtenant to the lands described in the present application; especially in view of the fact that there are other permits of record in Mr. Williams' name, besides the ones above referred to, in which the water claimed is appurtenant to practically these same lands.
