MEMORANDUM

TO: Files 47-07663, 47-12606 & 47-12607

FROM: Pam Skaggs^{PS}/State Office

SUBJECT: Transfer 5506

DATE: October 28, 1999

Transfer 5506 is adding points of diversion under Rights 47-12606 and 47-12607, and adds and changes the points of diversion, changes the place, nature and season of use under a portion of Right 47-07633, splitting the right into Parts A and B. The applicant is transferring additional water to a dairy to provide for expansion.

The applicant is removing 14.1 acres from irrigation to provide for additional stockwater and commercial uses at the dairy. A dairy worksheet provided by Chuck Brockway identified the stockwater and commercial requirements for the proposed expansion as 46.7 af for stockwater and 39.5 af for commercial use. These transferred rights when combined with Right 47-08252D, which is being licensed concurrently with this transfer, provide the full stockwater needs and most of the proposed commercial volume requirements.

Rights 47-12606 and 47-12707 are recent SRBA decreed rights that did not specify the extent of historical use under each right and are limited to a maximum of 13,000 gallons per day. The applicant provided evidence of at least 400 dairy stock under these rights or a maximum of 15.7 af for stockwater use split under both rights.

No expansion in use occurs through the proposed change in nature of use, and the net result is a reduction of diversion volume. Recommended conditions include drilling permit requirements, water quality standards, county zoning, multiple points of diversion/measuring device, non-historical use and 13,000 gpd limit for Rights 47-12606 & 47-12607, future annual reporting, land application of wastewater and standard transfer conditions.
