RE: Permit No. G-24308

Messrs. Arch T. & Robert J. Coiner
Route 3
Twin Falls, Idaho

Gentlemen:

The report of our field engineer on examination for completion of works and beneficial use on your Permit No. G-24308 shows that your well in the SW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 12, Township 10 South, Range 16 East, B.M. will deliver 65 inches of water which has been used to irrigate 179.63 acres in the SE $\frac{1}{4}$ Section 12, Township 10 South, Range 16 East, B.M. and Lots 3 and 4 Section 7, Township 10 South, Range 17 East, B.M.

A Certificate of Completion of Works and License can, therefore, be issued for 65 inches or 1.3 second feet upon receipt of the statutory fees. These amount to \$5.00 for completion of works and \$12.00 License fee, the latter being at the rate of \$2.00 for each 40 acre subdivision in which the land is located.

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plot same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plot same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

Ans. Henry H. Crow, age 60, residence and post office address R. F. D. 3, Twin Falls, Idaho. Occupation - farmer.

Ques. 2. Are you acquainted with Arch T. Coiner and Robert J. Coiner, the holders of Permit No. G-24308? How long have you known him and where does he reside?

Ans. Yes, I have known them since 1936.

Ques. 3. Have you read or heard read said Permit No. G-24308, and are you familiar with its provisions and conditions?

Ans. Yes, and I am familiar with its provisions.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Subterranean water diverted from a well located 49½ feet north and 24.4 feet east of the southwest corner of the SW¼ SE¼ of 12-10-16. Well is equipped with a 20 H. P. Peerless Turbine Pump, discharge pipe and open ditches.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

I would say works will convey to place of use more than 75 inches
Ans. of water and I have seen approximately 75 inches being so conveyed

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. I have seen approximately 75 inches of water delivered by the pump. I estimated the amount from my experience in using irrigation water.

P 24308

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Water is used for irrigation on 40 acres of NE $\frac{1}{4}$ SE $\frac{1}{4}$, 40 acres of NW $\frac{1}{4}$ SE $\frac{1}{4}$, 40 acres of SW $\frac{1}{4}$ SE $\frac{1}{4}$, 40 acres of SE $\frac{1}{4}$ SE $\frac{1}{4}$ Sec. 12-10-16 and 16.64 acres in Lot 3 and 2.99 acres of Lot 4 in Section 7-10-17. All land is cultivated land - none is natural meadow land. Water is used as supplemental water to present water right and has improved crops grown upon said premises.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. _____

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Volcanic ash soil which I would say requires at least 1 inch of water to the acre for profitable cultivation.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No sir.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I have seen the water used for irrigation on the above described land on several occasions during the crop seasons of 1953 and 1954.

Proof of Application of Water to Beneficial Use

Deposition of Witness and Completion of Works

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. J.A. McEwen, age 57 yrs., residence and post office address
R. F. D. 1, Kimberly, Idaho; occupation engineer for Twin Falls Canal
Company, Twin Falls, Idaho.

Ques. 2. Are you acquainted with Arch T. Coiner and Robert J. Coiner, the
holders of Permit No. G 24308? How long have you known him and where does
he reside?

Ans. Yes. I have known Arch T. Coiner since 1943 and Robert J. Coiner
since 1947.

Ques. 3. Have you read or heard read said Permit No. G-24308, and are you
familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for con-
veying water from point of diversion to place of use.

Ans. Subterranean water from a well located 49½ feet north and 24.4 feet
east of the Southwest corner of the SW¼ SE¼ of 12-10-16, equipped with a
20 H.P. Peerless Turbine Pump, discharge pipe and open ditches.

Ques. 5. How many second feet of water do you estimate said works will safely con-
duct to place of use, and how much water have you seen being so conveyed?

Ans. 1.51 second feet of water from said well and I have seen that amount
discharged from well. When equipped with additional bowls would produce
approximately 2 cubic feet per second.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons
per minute have you seen the pump deliver, and how did you measure or estimate the
amount?

Ans. I have seen 1.51 cubic feet per second delivered from said well,
measured with cipoletti weir.

All of said land is cultivated land. Improvement to crops raised has resulted from use of this water as supplemental water supply to that now appurtenant to the above described property.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. _____

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Volcanic ash requires at least 1 inch to the acre.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I have seen 1.51 cubic feet per second of water being used on said land above described on several different occasions since the spring of 1953. I last measured the water from the well on July 11, 1955.

ATTENTION: Mr. Edward H. Heap

Dear Mr. Heap:

In accordance with your letter of June 10th we are sending to the Twin Falls Times News, notice for completion of works and beneficial use on the above numbered Permits in the name of Arch T. Coiner and Robert J. Coiner, with instructions to publish each for four weeks prior to July 19, and to send the applicants the affidavit of publication together with statement of costs.

It was evidently an error in sending notice on Permit No. G-24308 directed to Sarah T. and Robert J. Coiner as these two permits are both in the name of Arch T. and Robert J. Coiner.

We enclose the forms of deposition to be executed by the Permit Holders and two disinterested witnesses in making these proofs. Separate depositions must be executed for each Permit.

In connection with the above numbered Permits we have taken the liberty of preparing a combination notice of hearing on proof of completion of works and beneficial use, to cover both permits. If the enclosed copies of the notice meet with your approval will you please execute the same and forward to the Times-News for publication in the Thursday issues of the paper necessary before the 19th day of July, 1955.

We are also enclosing instructions to publish the same signed by the two Coiners. One of the letters enclosing the instruction letter and blank notices was directed to Sarah T. and Robert J. Coiner, c/o Arch T. Coiner, with regard to Permit G 24308. We did not know of any assignment - will you therefore check your records to see that our Notice enclosed herewith is correct.

Re: App. of Arch T. & Robt. J. Coiner

Thank you for your letter of July 3, 1953 regarding the two applications of Arch T. Coiner and Robert J. Coiner to appropriate subterranean water and suggesting that the applications be made for a larger amount of water.

I have checked with Mr. Arch T. Coiner regarding increasing the amount of water applied for, and he has advised me that the wells will not produce more than the 100 inches and 75 inches respectively applied for. If the applications are satisfactory in all other respects will you please have them approved as submitted and then return them to our office.

Dear Mr. Heap:

We have your letter of July 1, 1953, enclosing applications of Arch T. Coiner and Robert J. Coiner to appropriate subterranean water, accompanied by your check for the \$10.50 filing fees.

We note what you say in regard to the amount to be developed from these wells and our suggestion would be that these applications cover the largest amount possible to be obtained, because the applications cannot be amended later for a larger amount and license cannot be for more than the amount applied for.

Since one of these applications is on 179.63 acres and the other on 160.45 acres, for which only 100 inches and 75 inches respectively are applied for, we would suggest that the applications be made for a larger amount. Of course that will require a slightly larger filing fee but we can advise you about that upon receipt of your reply.

Hon. Mark R. Kulp

Dear Mr. Kulp:

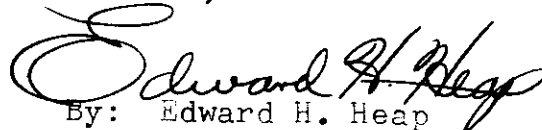

We are enclosing herewith two (2) applications of ARCH T. COINER and ROBERT J. COINER for permit to appropriate subterranean waters of the State of Idaho, one being an application to appropriate 100 inches through a well located in the SW $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 12, Township 10 S., Range 16 E.B.M., Twin Falls County, Idaho, and the other being an application to appropriate 75 inches through a well located in the SW $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 13, Twp. 10 S., Rge. 16 E.B.M., Twin Falls County, Idaho. We are also enclosing our check for \$10.50 to pay the filing fees for the two applications.

Both of the wells described in the applications have been drilled, cased, and the pumps have been installed, but the amount of flow from each has not been definitely determined, and it might develop that the amount of flow from each pump will be slightly under the amount applied for in the application. Would it be better to have the definite amount of the flow from each pump determined before the application is filed, or a corrected application filed? The flow will probably vary throughout the season if the water level lowers. We have filled in two (2) years as the time required for the completion of work and complete application of water to the proposed use as we understand that under I.C. Sec. 42-234 as amended by S.L. 1953, that is the least time that can be required for completion and application to the proposed use, but that proof can be submitted at any time before such time.

If the applications are satisfactory, will you please file and approve same, and then return them to our office.

Very truly yours,

STEPHAN, STEPHAN AND HEAP
