Gentlemen:

I have a couple friends who live North of Buhl who are quarrelling over water. Both happen to be friends of mine and have come to me separately for advise.

My answer to both has been the same. I first must know what rights you each have under your filings. The filings will no doubt show the location of the ditches.

One piece of property is the NW¹-SE¹-22-9-14. This land now belongs to Dr. Smedley of Burley. If my memory serves me correctly the water for this place was filed on by Link Norris, I believe R. L. Norris. I wish that you would look up and see what the date of the priority on this filing. I would also like to know the point of diversion and a rough drawing to show the course of the ditch.

The other filing would cover lands in Sections 22 and 23 and probably was filed in the name of T. E. Lyon. Mr. Lyon had 120 acres in each of these sections as well as 40 acres in Section 26 adjoining.

I will appreciate any information you may be able to furnish that will aid me in settling the dispute.

Yours very truly,

PROOF OF COMPLETION OF WORKS

R.L. Morris,

Buhl, Idaho

Boise, Idaho, **October 14, 1916**

Dear Sir:

Under the terms of your Permit No. **11911**---, you are required to complete your diversion works on or before---**January 10, 1917**----- I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.
