Water License No. 5632.

WHEREAS, On the 20th day of November, A.D. 1909, HENRY JONES, of Rock Creek, County of Twin Falls, State of Idaho, duly made application (No. 7926) to me for a permit to use 6.011 cubic feet per second of the waters of Artesian Wells, County of Twin Falls, State of Idaho, for irrigation and domestic purposes, and,

WHEREAS, On the 3rd day of January, A.D. 1910, Permit No. 5632 was issued to said applicant for the diversion of said water, and providing for the completion of the works of diversion therein described on or before the 3rd day of January, A.D. 1911, and for the application to beneficial use of said water on or before the 3rd day of January, A.D. 1911, and,

WHEREAS, On the 3rd day of March, A.D. 1911, HENRY JONES, the holder of said permit duly made proof of the completion of adequate works for the diversion of 6.011 cubic feet per second of said waters, as evidenced by my Certificate No. 5632, dated June 12, 1911, confirming the completion of works of sufficient capacity for diverting and conveying to the place of intended use 6.011 cubic feet per second of water, with date of priority of November 20, 1909, and,

WHEREAS, On the 3rd day of March, A.D. 1911, HENRY JONES, the holder of said permit duly made proof of the application to beneficial use of 3.8 cubic feet per second of said water:

NOW, THEREFORE, By virtue of authority vested in me by the laws of the State of Idaho, I hereby grant and confirm to HENRY JONES, of Rock Creek, County of Twin Falls, State of Idaho, the holder and owner of said Permit No. 5632, a perpetual right, dating from November 20, 1909, to the use of 3.8 cubic feet per second of the water of Artesian Wells, in the County of Twin Falls, and State of Idaho, or so much thereof as may be necessary for the purposes hereinbelow mentioned, to be diverted at a point in the North half of the Southwest quarter (N2 SW $\frac{1}{4}$), Section 6, Township 13 South, Range 17, East of Boise Meridian, and conducted to and upon Northeast quarter and North half of the Southeast quarter (NE $\frac{1}{4}$, N2 SE $\frac{1}{4}$), Section 1, Township 13 South, Range 16, East of Boise Meridian, 140 acres of the NE $\frac{1}{4}$ and 50 acres on the N Line of the N2 of the SE $\frac{1}{4}$ is and has been in hay and grain, for the purpose of irrigation and domestic use, subject, however, to the laws of the State of Idaho applicable to a license for the use of the waters of the State, and subject, also, to the local or community customs, rules and regulations which have been or may be adopted from time to time by a majority of the users from a common source of supply, canal or lateral from which such water may be taken, when such rules and regulations have for their object the economical use of such water.

WITNESS, My hand and the seal of my office at Boise, Idaho, this 12th day of June, A.D. Nineteen hundred and eleven.

7. Description of works for diversion:
8. The time required for the completion of the construction of such work is one year.
9. Time required for the complete application of the water to the proposed use is no additional years.

BE IT KNOWN, That the undersigned hereby makes application for a permit to appropriate the public waters of the State of Idaho as herein set forth.

Henry Jones, Applicant.

Remarks: In order to irrigate the three hundred and twenty acres it is necessary that pipes be laid from the point of diversion as shown by the map filed herewith; pipes to be laid, probably a distance of a quarter of a mile, which will require an expenditure of probably five hundred dollars. The water has already been appropriated and one half of the land or more is in cultivation, and it will all be under cultivation within one year from the date thereof. The water was discovered in the fall of 1907, and has been used to irrigate with from that date and will require the whole amount of 305.5 inches to irrigate the land described herein, and the whole of said land can be irrigated, and will be irrigated from the artesian wells when said piping is laid, which piping will be laid within a year from this the 11th day of November, 1909.

There is no dam or reservoir located near this well. The water is used for irrigation purposes and drawn from well only as same is used.

APPROVAL OF STATE ENGINEER.

Twin Falls, Idaho 83301

Dear John:

Your letter of April 24, 1969, referred to the application for transfer of water right which was recently approved for the Jones Corporation. The question you raise involves the same issue that we have discussed on previous occasions and that is, "What is the extent and measure of the water right?"

It is not our intention to limit the Jones Corporation to anything less than the amount of water that was previously required to irrigate the 190 acres of land, but I am certain that you can see that the amendment to the original right to irrigation of 2,005 acres brings up the probability that more water would be diverted from the well than was originally required. For this reason, we have arbitrarily determined that for the area, 3-1/2 acre feet of water per acre is an adequate supply. This determination is, of course, subject to action by the court at the time the water right is adjudicated.

We feel that we must approve the transfer with this type of limitation to prevent Jones Corporation from assuming that it may now use the well to withdraw considerably more water than was formerly necessary.

We intend to publish sometime this year a report in which we will include three items:

- (1) Our preliminary determination of reasonable ground water pumping levels;
- (2) The duty of water determination which we have made by area throughout the State; and
- (3) A preliminary determination of reasonable irrigation seasons.

5/2/69

These are intended for guidelines only and will be subject to review and modification after considerable discussion with attorneys representing the various organizations and other State and Federal agencies. I will make sure that you get a copy of that report.

Very truly yours,

R. KEITH HIGGINSON
State Reclamation Engineer

Re: Jones Corporation, License No. 5632
Transfer No. 1591

Dear Keith:

A couple of weeks ago Ora Jones, an officer of the Jones Corporation, brought to me an approved application for change of place of use on which he had apparently made application on the 6th day of February, 1969. As closely as I can tell, the purpose of this application for transfer is the start of an attempt to make all of the Jones Corporation's water rights appurtenant to all of their ground. As you will note, Water License No. 5632 licenses 3.8 cubic feet or 190 inches to 190 acres. In the application for transfer of a water right, under the portion marked "Action of the State Reclamation Engineer and Certificate of Transfer," you approved the transfer but tentatively set the amount that can be produced from the well (licensed under 5632) to 3.5 acre feet per acre on 190 acres or 665 acre feet per season.

I presume that the application filed by the Jones Corporation to change the place of use of the water was done in accordance with the provisions of Idaho Code § 42-222 inasmuch as this is probably not an amended permit within the provisions of Idaho Code § 42-211. In any event, I presume that the right given to the Jones Corporation in the amount of 190 inches by Water License No. 5632, without other restrictions of which I might be unaware, granted to them a license to beneficially use 190 inches during the irrigation season. I think that probably Idaho Code § 42-202 or its predecessor authorized the licensing of an inch per acre since 1903 if the statutory method was pursued.

At this point, presuming no one objected to the recently proposed transfer, and no one is injured thereby, why the reduction to 3.5 acre feet per acre per season? Even assuming that House Bill 45 had become law (which I don't think it had on the date of the application or on the date

47 206

Mr. R. Keith Higginson

- 2 -

of the approval) and you were entitled to determine that the transfer constituted an enlargement in the use of the original right, again why the reduction to 3.5 acre feet for 190 acres rather than a reduction to 5 acre feet for 190 acres? Have you determined the beneficial use is 3.5?

In my previous conversations with you, I realize that we have differed as to whether or not transferring a given right to more acres constitutes an enlargement. In this particular case, there may be factors of which I am unaware, but it seems rather harsh to reduce an inch per acre right to what is really a third of an inch per acre right, assuming the water is run throughout the irrigation season on a 24 hour a day basis. I am sure Mr. Jones would have had second thoughts about transferring the water under License No. 5632 had he understood that this limitation would be imposed. As best I can figure, with the number of irrigable acres which the Jones Corporation has, and totalling their water rights, if they were to make all of their rights appurtenant to all of their land, they would have approximately 2.25 acre feet per acre annually (depending on whether or not the Salmon River Canal Company has a good year and presuming 5 acre feet per inch of right.)

As you and Bob Hamilton probably know, it was the hope of the Jones Corporation to make all of their water appurtenant to all of their land. But if they must stand a reduction in their rights to accomplish this, I am sure they will have second thoughts.

At this point, I have not had a chance to talk to Bob Hamilton who apparently handled this transaction nor have I had a chance to confer with him confirming his previous conversations with Ora Jones in regard to the transfer of all the water rights to all of the lands as mentioned above.

I would appreciate hearing from you in regard to the questions which I have raised in this letter. Thank you for your continuing cooperation.

Sincerely,

JOHN A. ROSHOLT

Dear Mr. Hamilton:

This will acknowledge receipt of your letter of October 4, 1944, in which you enclose copy of deed to water right from Ora Jones to Ora Jones, said deed conveying two (2) cubic feet per second of a certain water right issued to Henry Jones by State License No. 5602, for 3.8 cubic feet per second of subterranean water.

This is License No. 5632 (not 5602) and is in the name of Henry Jones; there being no record of any transfer from Henry Jones to Ora Jones, which would have to be shown before we could record a transfer from Ora Jones to some one else.

We know of no other legal way whereby a water right can be transferred changing the place of use other than following the State statute- Section 41-216, Idaho Code Annotated.

We enclose herewith a couple of blank forms to be used for filing an application for transfer of water right.

Permit 5632-Henry Jones

John F. Hansen,
Rock Creek, Idaho

Sir:-

In reply to your letter of the 7th inst. would say that, if you will read the notice of publication under above permit, you will find that the notice published is for both proof of completion of works and beneficial use of water. When both proofs are made on the same date the publication notice is combined in one notice, thus saving the expense of two publications. Our files show that deposition blanks for both proofs were sent you on January 24th and the depositions for proof of completion of works should have been filled out at the same time as the final proof blanks. It is not necessary for Mr. Jones to fill out another publication notice. All that is necessary is to fill out the proof of completion deposition blanks and send them to this office, together with an affidavit showing why said proof was taken at a later date than advertised.

Trusting I have made this matter plain, I remain

Hon. D. G. Martin,
State Engineer,
Boise, Idaho.

Dear Sir:- Replying to yours of yesterday in relation to the proof of completion of work under permit 5632 (Henry Jones) will say that at the time of sending in the notices for publication, or rather applications for publication, two notices were sent, one for completion of works and one for beneficial use of water. Only one affidavit of publication was received from the Hollister Herald, and we, Mr. Jones and I, came to the conclusion that you did not require a proof of completion of works in this case, where the works are practically contained in the wells drilled on the land.

I shall endeavor to get in communication with Jones at once and have him sign another application for publication, if the is necessary, but as Jones is at present feeding cattle about thirty miles from here and about the same distance from the nearest post office it may be several days before I can get him. In the mean time send down an application to make proof of completion of works, as we have none such here.

Hoping to get this matter straightened out without many more proofs I am

Sir:- I am today in receipt of yours of the 3rd inst.,
inclosing depositions in proof of beneficial use of water,
affidavit of publication and check for \$16.00.

As the depositions for proof of completion of works were
not inclosed, I take it this proof was not made. If such
is the case the inclosed blanks should be filled out at
once and returned to this office together with an affidavit
showing why the proof of completion of works was not made

Deposition of Permit Holder,

Depositions of Two Witnesses.

In submitting this proof the following instructions should be CAREFULLY followed out, since failure to do so may result in the loss of your rights:

1. On **March 3, 1911**, the date set for proof, the enclosed forms (two for permit holder and two each for two disinterested witnesses) should be filled out and sworn to, at **Rock Creek** before **John F. Hansen, N.P.**

2. When the depositions have been taken they should be mailed to this office, together with affidavit of publication of notice and fees as follows: Fee for proof of completion of works is \$5.00 for ten second feet or less. Over ten second feet a charge of 30 cents a second foot is made. The fee for beneficial use of water, for power purposes is \$5.00; if for irrigation, \$2.00 for each 40-acre tract, or fraction, to which water has been beneficially applied.

When these have been received, together with report of the Water Commissioner, if everything is properly executed, Certificate of Completion of Works and License will issue.

Yours truly,

~~JAS. STEPHENSON, JR.~~

State Engineer.

Permit 5632-Henry Jones

John T. Hansen,
Rock Creek, Idaho

Sir:-

Your letter of the 12th inst. to hand and contents noted. In reply would say that the notice of proof was never received here, hence, the publication has not been made. If the notice was mailed it must have been lost on the way. I am inclosing herewith new blanks to be filled out and at the time proof is submitted Mr. Jones can file an affidavit showing why proof was made later than the date set out in the permit.

Very truly yours,

State Engineer.

ROCK CREEK, IDAHO, January 12th. 1911.

Hon. D. G. Martin,
State Engineer,
Boise, Idaho.

Dear Sir:- On January 3d. Henry Jones of this place, with two witnesses appeared to make final proof of beneficial use of the waters of certain Artesian Wells on his ranch in Tp. 13 S. R. 16 E. I remember that sometime about November 1st. Mr. Jones had his notice for publication prepared, and sent to your office, but I have failed to see it published in any of the local ~~papers~~ papers, and have come to the conclusion that his application must have been mislaid or overlooked.

Please look this matter up, and let me know what to do about it. Mr. Jones called again today, to learn something about it, but as I had no information to give him, promised to write you in regard to it.

Hoping for an early reply, I am

Yours truly,

John F. Hansen
