

Figure 1 consists of 12 line drawings labeled (a) through (l), illustrating the stages of chick development. (a) shows a fertilized egg with a single cell. (b) through (l) show the embryo at 1-day intervals, showing the growth of the yolk, the formation of the embryo, and the development of the beak and legs. The drawings are arranged in a grid-like fashion, with (a) at the top left and (l) at the bottom right.

| Trial | No feedback (%) | Feedback (%) |
|-------|-----------------|--------------|
| 1     | 75              | 85           |
| 2     | 70              | 80           |
| 3     | 65              | 75           |
| 4     | 60              | 70           |
| 5     | 55              | 65           |
| 6     | 50              | 60           |
| 7     | 45              | 55           |
| 8     | 40              | 50           |
| 9     | 35              | 45           |
| 10    | 30              | 40           |

Figure 1. Percentage of correct responses as a function of trial number. The graph shows two conditions: 'No feedback' (solid line with open circles) and 'Feedback' (dashed line with filled circles). The 'Feedback' condition consistently shows higher percentages of correct responses across all trials compared to the 'No feedback' condition.
