Dear Sir

I am a little confused about these papers, but have done my best.

I own thirty acres of subdividing property. Water is in three different houses now. My intention was to build large system on hill and prepare it to take care of four more. But did not intend to do it until I retired in two more years, or maybe I will never be able to do it.

The mill utilities is being bought from
R.V. PARK
a near by K.O. Park now. I do not know for sure whether this will work out. I had the pipe partly in place for my source, but this was easier from the park.

I will enclose the fifty dollars for what I have. Would you please let me know what problems I would have to continue with my plans if I do decide to. Thanks Leo S. Godwin

Dear Mr. Godwin:

Re: Permit No. 84-7119

Returned is the proof of beneficial use form submitted to this office on December 5, 1986.

Before the department can accept this form, several items regarding the status of your water right need to be made clear. The permit proposes a project of four domestic uses and a commercial use for mill cleanup and drinking and restroom facilities. It appears that three out the four houses have been built and that you may add several more.

At this time you have the option of submitting the proof of beneficial use form, which is a signal to the department that the project is completed and you are ready for the department to conduct a field inspection to determine the extent of use and to issue a license accordingly. If you should decide to file this form, the department will license the permit for only the extent of use found at the time the field inspection is conducted. That means that any development occurring after the field inspection may need to be recorded as a separate water right. (The fee based on the 22 gallons per minute rate indicated on the proof form would be \$50).

Or, you can ask for an extension of the proof due date. This would give an additional period of time to develop the other residences as mentioned on the proof form. This would be feasible only with you intended to develop the residences within five years. At the end of the addition period of time, the department would again notify you that proof was due.

Review the information and forms provided. Please return one of the forms by March 1, 1987 to keep the permit in good standing.
