Dear Mr. and Mrs. DuClercque:

Re: Permit No. 84-7109

PROOF DUE NOTICE

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before October 1, 1988. (See the last page of your approved permit or your last approved extension request). Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time provided the delay is for reasonable cause as described in Section 42-204, Idaho Code. If you have been prevented from proceeding by a government agency or by litigation, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing the lapse notice, the permit will no longer be of any force nor effect.

Sincerely,

Mr. Saxton,

I received your letter of my water use lapse notice. I sent all these forms to your office in June of 1986. It seems that you did not receive those forms so I am sending this set.

I have been hand irrigating with ditches from this pond. Due to financial problems I have not been able to do all the work required by your department. My wife and I have got the financial problems in hand, but it was tough and go for awhile. We still need this water permit and hope you give us an extension.

Thank You,

Kamiah, Id. 83536

Dear Mr. DuClercque:

I am returning your application for some changes. First, there is a filing fee required that must accompany the application. The fee system is graduated in nature so the fees vary with the amount of water appropriated. I am including filing instructions along with a new application. The fee schedule is on the back page of the instructions.

I researched the existing water right on the pond and you already have a valid water right for stock watering, fish and recreation. So, the only thing you need to file for is irrigation.

The Department allows up to 0.02 cfs per acre of irrigation. The amount and location of the land you plan to irrigate must be placed in Item No. 8.b. You should only enter the number of acres you actually plan to irrigate.

Since I don't know how many acres you are planning to irrigate, I cannot fill in the quantity in Item No. 4, but I will fill in the rest and if you will just multiply the number of acres irrigated and enter it where I have indicated with an arrow, it will be acceptable.

In Item No. 11, the map must be referenced to some scale. Also, the number of irrigated acres in each 40-acre tract must be indicated on the map.

Please complete the application in ink and return it along with the filing fee as soon as possible. If you have any questions or need any assistance, please contact me.

Sincerely,

LAWRENCE D. BEARD
