

(8) Remarks This Land has never been used extensively for grazing due to lack of water. It is 3/4 brush and fairly heavy timber and during the time of my knowledge (and it has been in the family since the early 1900's) there has never been a house on the 80 Acres involved.

Sirs:

I hereby submit three water claim forms, notarized here, one for each of three separate land parcels in Idaho County, which land I now own. Also enclosed, my check for \$90. to cover fees.

According to literature received from you, it is not necessary to file these claims. The water, little though there is on the property, has been used by our family for these same purposes for a very long time, in fact since before my birth (1918). I have had interest in or have owned the land since 1902.

However, I see no real way to be sure that this water is fully available to use on this property, under the circumstances of modern courts and behavior of people, without going on record as having filed a proper claim.

It may be that the services of a lawyer versed in water claims is necessary, but this paper work should comply with the deadline established. I do not know such a lawyer at the moment. If my action is not sufficient, please so advise, and I will obtain proper legal advice for preparation of whatever is necessary.

The land owned has so little in water resources, I can hardly risk any possible outside claim or trespass on these rights. I find it difficult to realize that the springs on the land are not automatically part of the property, but I do understand that almost anything can be twisted to fit a situation, and at least, cause trouble. In the past, it has always been understood/assumed that the water resource was part of the property.

The uses shown are best judgment of average use over the years, and the equivalent usage continues by present renters. I plan to continue the same use when I am again able to occupy the property.

Very truly yours

Leo C. Moon
