TO: Dam Safety, Boise/ File D86-7302

SUBJECT: Final Construction Inspection, Kingery Dam,
December 16, 1993.

BY: David D. LePard

On Thursday I visited the dam to check construction and measure the final structure. Pictures were taken.

The dam had the following dimensions on December 16, 1993:

Structural Height:	16.1 ft.	Hydraulic Height:	11.4 ft.
Freeboard:	4.7 ft.	Crest Width:	12.0 ft.
US Slope:	3:1	DS Slope:	2:1
Outlet: None			
Spillway Width:	13.0 ft.		
Spillway Depth:	4.7 ft.		
Spillway Side Slopes left: 2:1 right: 2:1			
Storage Capacity: 5.7 acre-feet			

The dam has been completed since 1991 but this was the first time my schedule put me in the area for an inspection.

Since the downstream hazard is low, the dam as constructed is small enough to forego regulation under the dam safety act. The dam should be put on the five year hazard review list.

Dear Ms. Skaggs:

Enclosed are the completed "Proof of Beneficial Use" forms you sent to me. I draw your attention to Item 6 which refers to the volume of water the ponds will hold. The original amounts stated on my applications were over-estimated. My husband and I conferred with David Le Pard, Engineer Geologist at the Department of Water Resources in Coeur d'Alene and Dick Kern, Soil Conservation Service officer who designed the ponds. From these conversations, the new calculated volumes are 3.8 AF for the larger pond and less than 1 AF for the smaller pond.

Please let me know if there is any further information you need. Thank you.

RE: PERMIT NO. 86-07302

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed you should complete and submit this form immediately.

If the diversion dam is 10 feet or more in height, or has an impounding capacity of 50 acre-feet or more, certain dam safety requirements must be met. Please contact the regional office nearest you for details.

Re: Appropriation Application

Dear Ms. Kingery:

The Idaho Department of Water Resources has received your two Applications For Permit To Appropriate The Public Waters Of The State Of Idaho, your small dam application and your filing fees in the amount of \$70.00 for which receipt #N-004719 is enclosed. However I regret to inform you that the appropriation applications are not acceptable in their present form, so I am returning them to you for clarification or completion of the following:

Item #3 and item #9, must reflect the same location as indicated on item #13. It is not possible to check this information since the section corners on the map you provided are not identified and the scale is not 2 inches equal 1 mile as indicated on the map.

Item #13: I have taken the liberty of providing a map of the section you indicated for each application at the scale of 2 inches equal to one mile. The point of diversion and place of use must be labeled. The point of diversion and place of use must agree with items #3 and #9.

The Application must be completed and returned to this office with any other information you deem appropriate within 30 days of the above date. Failure to communicate with this office within that time may result in the voiding of your application.

If you have any questions or if I can be of any assistance please feel free to contact me at this office.
