CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Domestic use is for 1 home.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 86-07292

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the NORTHERN Regional Office in Coeur D' Alene at (208)765-4639.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 86-07292

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before July 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

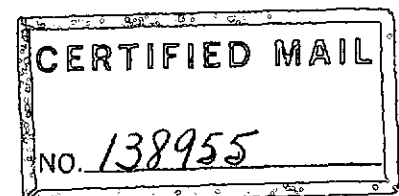

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

MEMORANDUM TO FILE
APPLICATION FOR PERMIT
NUMBER 86-07292

DATE: June 18, 1991

BACKGROUND:

During the SRBA Claim Verification Examination conducted June 5, 1991, I spoke with Mr. Isaacson as to the reason why he filed this Application for Permit.

Mr. Ross Isaacson and Mr. Jim Travis have shared water from Spring #1. since the Isaacson's moved to this property. Mr. Travis's use of the water is for domestic irrigation of his rental. Mr. Isaacson's use of water is for domestic (mainly for Culinary purposes) and domestic irrigation if possible. Due to water shortages in the past, Mr. Isaacson stated that he was interested in developing additional sources of water to serve their domestic water needs.

The reason that water is used only for domestic irrigation for Travis's rental is that a petroleum spill occurred in 1976 which contaminated the water in Spring #1. Mr. Isaacson expressed no concern that the water from Spring #1 was a health hazard.

SRBA CLAIM # A86-04238:

The existing diverting works include at Spring #1; a 6' X 6' X 4' deep reservoir, 2 HP pump which delivers water to a 2,000 gal. reservoir which is pumped by a 2 HP pump through 3/4" PVC pipe to home.

There is some question at this point as to the validity of this claim due to a period of non use by the Rowdens after the petroleum spill.

ISAACSON'S SYSTEM DESCRIPTION OF PROPOSED DEVELOPMENT FOR APPLICATION FOR PERMIT # 86-07292:

SOURCES: ROWDEN SPRING - Overflow only (Verbal access agreement)

SPRING #1. - Shared with Mr. Travis

SPRING #2. - Undeveloped as of June 5, 1991

* See State Highway Survey map.

DIVERTING WORKS:

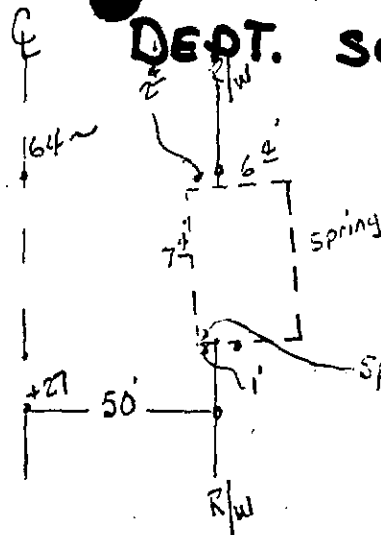

The proposed diverting works include a 4 HP pump located at Spring #2 and 1" PVC pipe, plus overflow from Rowden Spring gravity flow to 2,000 gal. reservoir. From the 2,000 gal reservoir a 2 HP pump will deliver water through 3/4" PVC pipe to home.

Water from Spring #1. will be used for backup purposes.

Re: State Highway No. 99; Project No. S-75(1)

Dear Mr. Travis:

As you requested, our survey crew has located the spring and holding tank in relation to the highway right-of-way. The enclosed plan shows that the major part of the holding tank is on private property; however, a small portion does lie within the highway right-of-way.

The department would be willing to issue a right-of-way use permit for the encroachment. However, since there appears to be a difference of opinion as to who has the controlling right to the spring, the department will reserve granting such a permit until the issue has been resolved.

A copy of this letter is also being sent to the Isaacsons and their attorney, John Irwin, for their information.

If you have any questions, please contact me.

Sincerely,

Michael Richardson
