Dear Mr. Winn:

One of the conditions of approval of your water Permit No. 86-7018 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before April 1, 1973. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Re: Application for Permit No. 86-7018

Mr. Clarence Winn
Route #1
Post Office Box # 498
Deary, Idaho 83823

Dear Mr. Winn:

During initial processing, some questions have arisen concerning your application for permit. We have taken the liberty of re-typing your application for reasons of clarity.

Item #2 indicates that your source of water supply is from snow melt. Is there any stream or spring that supplies your water, or is it strictly from run-off.

Item #4 should indicate the diversion rate for stock water and the period of use as it is presently. It should also include the 1.3 acre feet figure, with the period of use indicated as January 1 through December 31.

Item #7a should indicate at least one year to allow time for processing and any changes you might want to make.

If you should have any further questions regarding this matter, please feel free to contact this Department.

Very truly yours,

This is a former pond. The only source of water is run-off from snow-melt. The drainage area is less than 5 acres. An emergency spillway was constructed. However, height of water can be regulated by the pipeline which can be opened to outlet the water into Brush Creek.

Dear Mr. Winn:

I am writing in reply to your recent application to construct a small earthfill dam for the purpose of impounding stock water. Although the height of this dam places it under the jurisdiction of our department, its storage capacity is so small that we do not feel that it will be necessary for us to inspect the project during construction. The design of the dam, as proposed in your application, is hereby approved and you may proceed with construction at your convenience. Please notify the department when the dam has been completed and notify us of any changes in the design.

The department's approval of your proposal to construct a dam does not constitute a water right for the project. In order to obtain a water right to fill the reservoir, you will need to apply for a separate permit on the application form that I have enclosed.

Please notify the department if you have any questions.

Sincerely,

WILLIAM R. GOSSETT
Dam Safety Engineer
