10. Remarks Water
The city of Kendrick tried to furnish the school/to water the athletic field and recreational area, but we have found that they do not have enough water to supply the school with the needed water. Bear Creek has the water and it runs along the area in this application. Bear Creek drainage is 150 sq. miles. U. S. Army Engineer District, Walla Walla, Wash. March 1968
The only use of the water will be for irrigation. The city of Kendrick has informed the school that will be unable to furnish them water, to water the Athletic field and recreational area, from this year on. The city just does not have the water storage space. If we are going to continue with our present program we need water.

One of the conditions of the approval of your Permit No. 86-7011 was that proof of application of the water to beneficial use be submitted to this office on or before October 1, 1970.

Enclosed is an affidavit form which must be used to submit proof of beneficial use. You may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended.

Either the proof affidavit or a request for extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr. McEldowney:

We are requesting a letter that our permit for use of water is authentic from your office.

I tried yesterday to record our water permit and the auditor would not record it because it was a copy and not an original.

Could you please attach a certified letter, stating that this copy is authentic. This is what we need to get it recorded.

Thank you.

Sincerely,

James V. Muscat

Gentlemen:

We are in receipt of the affidavit of publication and bill for the above referenced.

In order to receive payment, the following certification must appear on the bill:

I hereby certify that the foregoing account is just and correct, that the amount claimed is legally due, after allowing all just credits, and that no part of same has been paid.

Signature of claimant

Therefore, we are returning the bill in order that you may certify it. Upon receipt of a certified bill for the above, we will submit it to our accounting department for payment.

Your cooperation in this matter is appreciated.

Very truly yours,

Dear Mr. McEldowney:

In reference to letter of October 23 and telephone conversation of October 28th.

1. We are requesting additional water for the watering of Kendrick Joint School District recreational and athletic field along Bear Creek as per application 86-7011. This application is due to the fact that the City of Kendrick is unable to supply the School District with an adequate supply of water during the summer months. If the application is approved it will certainly be an asset to the City and School District.
2. Nozzle pressure at head: Volume of water 20# per square inch. 5.13 gal. per minute, diameter 75 feet.
3. Pump pressure for 7 nozzle heads
 - a. 2350 gal. per hour
 - b. 10 feet lift
 - c. 2 inch suction
 - d. 1 1/2 inch discharge
 - e. 116 feet of run
 - f. Pressure: 50# per square inch
 - g. Maximum total shut off head: 50# per square inch

I certainly hope this will give you the necessary information. If you need further information, please contact me.

Sincerely,

James V. Muscat
Supt. of Schools

Re: Application No. 86-7011

Mr. James V. Muscott, Superintendent
Kendrick Joint School District #283
Kendrick, Idaho 83537

Dear Mr. Muscott:

We are in receipt of your application to appropriate the public waters of the State of Idaho. Please be advised that before final action can be taken on your application we will require some additional information.

The quantity of water you have requested for irrigation purposes is excessive as indicated under Idaho Statutes. The maximum rate of diversion that can be allowed per irrigated acre is .02 cubic feet per second. We realize that on small irrigation systems it is very difficult to irrigate small tracts of ground with this extremely small amount of water. Therefore, we have the option of allowing additional water when it can be shown to the satisfaction of the State Engineer that additional water is required. The normal requirements of justification are a soils report or a description of the system you are installing, your capacities, and etc.

Your assistance in this matter is appreciated.

Very truly yours,

Donald W. McEldowney
Appropriation Examiner
