WATER RIGHT NO. 81-07045

Priority: February 22, 1977 Maximum Diversion Rate: 0.35 CFS
Maximum Diversion Volume: 52.5 AF

This is to certify, that LINWOOD LAUGHY
HC 75 BOX 13

KOOSKIA ID 83539 has complied with the terms and conditions
of the permit, issued pursuant to Application for Permit dated February 22, 1977; and
has submitted Proof of Beneficial Use on March 26, 1980. An examination indicates
that the works have a diversion capacity of .350 cfs of water from:

CLEARWATER RIVER, MIDDLE FORK tributary to CLEARWATER RIVER

source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 3.0 afa per acre for the lands above.

FROM: Beardslee

TO: 81-07045 (Field Exam)

IDWR tried on several occasions to conduct a Beneficial Use Field Examination for Permit Number 81-07045 since 1980. However, due to Mr. Laughy residing in Alaska and sporadic irrigation practices, IDWR has not been able to complete an on-sight Beneficial Use Examination.

On December 6, 1993, I obtained a letter from Idaho County Light & Power, that showed the Kilowatt usage for Mr. Laughy's irrigation pump.

On December 7, 1993, I contacted Mr. Laughy by phone and he described the property that he irrigated on his property. Using land marks on an A.S.C.S, aerial photo, I was able to outline the area that Mr. Laughy described and then computed acreage with a Lasico planimeter.

I regret any inconvenience to you caused by the Department and wish to assure you that I too wish to conclude this matter as quickly as is possible.

The best method of accomplishing this is for you to notify this Department of the date you will be irrigating at full capacity so that we can schedule an appointment at a convenient time.

Please give a two-week advance notice to allow us time to make the necessary arrangements.

If we can be of any further assistance, please contact me at this office.

Dear Mr. King,

I have recently been advised by Mr. Jim Johnson that the matter of my water right application, permit number 81-7045, has been referred to your office for further study. I enclose copy of a letter to Mr. Johnson of November 14, 1987. I requested a response to this letter on January 11, 1988, which apparently led to the referral of the matter to your office.

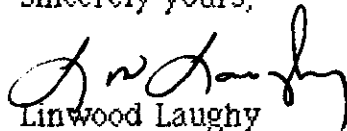

I enclose copy of the November 14 letter in case you do not have such. I also have copy of the original application requesting irrigation for 22 acres and stockwater for 22 horses/cows should this be of any help to you.

My irrigation system continues to be parked approximately 100 feet from the end of my tramway across the river - 1400 feet of pipe on a 40 foot trailer. It was in the same location when an inspection was apparently made in 1985 and note made of a small pump irrigating the garden area.

Please advise me what your intentions are concerning my application for water rights. I wish to conclude this matter in the near future.

Thankyou.

Sincerely yours,

Linwood Laughy

RE: FIELD EXAMINATION

On Nov.18 1987 I received correspondence from the permit holder stating that he did not agree with the license as proposed in my pre license correspondence. After reviewing the matter I decided to return the Field Exam to the Regional Office for follow-up because I could not determine if a mistake had been made that would unjustly limit the amount that should be reconized.

The field examiner making the examination is no longer employed by the Department, therefore, I could not discuss this with him.

Dear Mr. Johnson:

I am in receipt of your letter of November 2, 1987, concerning Permit No. 81-7045. I have had some preliminary discussion concerning this matter during the past week with Ms. Kay Walker in your office, and now seek further clarification of the water right that is proposed to be issued to me.

I filed with your department on March 26, 1980, a statement that I had completed the development of my proposed water system in accordance with an earlier application for a water right. At some point (I believe the previous summer) I also spoke with a gentleman in your Coeur d'Alene office about inspecting the system, and was informed that he would do so on his next trip to Boise. He indicated that if I was not home, and hence could not bring him across the river, he could nevertheless see the system operating from across the highway side of the Middlefork. I heard no more of the matter, and presumed that the inspection had been made. My irrigation system consists of a 10 horse pump, 800 feet of 4 inch aluminum pipe, 600 feet of 3 inch aluminum pipe, and approximately 32 sprinkler heads. My statement of completion indicates that I used stockwater for 22 horses and cows, and irrigated 22 acres.

The proposed water right no. 81-7045 indicates a rate of diversion of only .04 cfs, a total of only 6.0 afa, and irrigation of only 2 acres. This is not accurate. Apparently an inspection was made in 1985 while I was working in Alaska, and a renter was using a small system for irrigating the garden area and lawn. My major irrigation system was here at the time (and continues to be), with the pipe trailer and pipe in the field near the garden and the pump in the barn.

RECEIVED

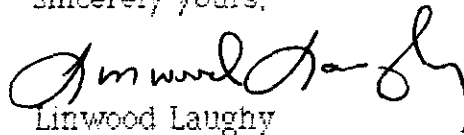

APR 20 1994

I have discovered that it is not feasible to extend my irrigation system to the far end of my acreage along the river, and hence believe that 15 acres is a more accurate description of the area I wish to irrigate. The stock I have had on my property made direct use of the river, but I am concerned lest this ability be lost in the future and thus require that I pump water for them.

Ms. Walker indicated that you would hold the proposed license until this matter could be further discussed. Please advise me what further actions I may take to secure the water right that I applied for in 1978 or 79, and for which I purchased the appropriate equipment, and which reflects my actual beneficial use of the river.

Please advise me in this matter at your convenience.

Sincerely yours,

RE: 81-7045

Dear Mr. Laushy:

The final stage of the permit process is the issuance of a License which is prima facie evidence of a Water Right. Before this license can be issued an examination of the system, while in operation, must be conducted. You may retain the services of a Registered Professional Engineer for this purpose or you may make an appointment with this office to have a representative of this department conduct the examination at your convenience. There is no charge for the representative's services.

Since the system must be in operation during the examination, please contact this office at least two weeks in advance of the date you wish to have the examination conducted.
