RE: Permit #81-7000

Dear Mr. Knutson:

In reply to your letter of June 4th wherein you have requested the proper procedure in transferring the subject water right license to A.G. and Charlotte Meisner, please be advised that no actual transfer to the new owners is necessary. All licensed and decreed water rights are appurtenant to the land unless specifically excepted in the deed. It would be helpful, however, if you could send us a copy of the deed showing transfer of ownership and we will add it to the file for future reference.

In the case of a water right in the permit stage, it is necessary to submit an assignment, assigning the water right to the new owners.

If we can be of further assistance, please advise.

Sincerely,

Marcia L. Brown

Dear Mr. Fleenor:

RE: Permit # 81-7000

The property for which the above referenced water right was issued has been sold by V.H. and Helen C. Ruckman to A.G. and Charlotte Meisner, and we need to make inquiry as to what might be necessary to transfer this water right with the property that has been sold.

We are contacting your office because the former owners, Mr. and Mrs. V.H. Ruckman have a communication from you, dated January 4, 1974, in which your office sent to them, their water right license and we assume your office would also have jurisdiction over any transfer or other registration that might be required of the new owners.

Could you please correspond with us to advise what might be necessary in this matter.

Dear Mr. & Mrs. Ruckman:

A representative of this Department has made an examination of the works covered by your Permit No. 81-7000 and has found the following:

Quantity of water diverted: 0.05 cfs Source: Middle Fork of Clearwater River

Amount of water that can be recognized as beneficially used under Idaho law: 0.05 cfs

The maximum quantity diverted shall not exceed 7.5 acre feet per year.

Beneficial use: For irrigation of 2 1/2 acres within the SW 1/4, Sec. 2, SE 1/4, Sec. 3, Twp. 32 N, Rge. 5 E

Point of diversion: SE 1/4, Sec. 3, Twp. 32 N, Rge. 5 E, B.M.

Priority date established: August 28, 1967

If you do not concur with these findings, please advise us within 10 days; otherwise, a license will be issued as set forth in this letter.

Re: Permit #81-7000

Gentlemen:

Enclosed herewith is V. H. and Helen C. Ruckman's Proof of Application of Water to Beneficial Use.

The Ruckmans ask for waiver on the question of measuring device for reason that the water supply of the Middle Fork of the Clearwater River has had an unlimited supply of water and the amount that they take out therefrom would be insufficient to in any way diminish such a supply, and on the further grounds that the use of such water is solely for the purpose of irrigating their yard and garden during the summer and late fall months of the year.

Very truly yours,

Dear Mr. & Mrs. Ruckman:

One of the conditions of approval of your water Permit No. 81-7000 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before December 1, 1972. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Sirs:

Department of Reclamation

We would like our permit extended until such time as you can install a meter. ^{if you consider} when that is done next summer we'd like some one to come and check it officially. Then we can intelligently fill out our proof of application.

We're enclosing data concerning the amounts of water to be used - not understandable to you than to us. The first is from Vic Armacost - Army Eng Walla Walla. The second an estimate from Allen Janssen former head of Eng. U. of Ida.

Sincerely yours

W. H. Ruckman

Val:

The amount of Water applied varies considerably with the type of sprinkler. However, I think 10 gpm Per sprinkler will probably be as much capacity as you will want.

$$10 \text{ gal Per minute} = 0.022 \text{ Cubic Feet Per Second (CFS)}$$

For 8 Sprinklers you would use 0.176 CFS or you need about 0.2 CFS which is 10 inches of water.

Dear Val,

I promised to write to you regarding some calculations on your pump installation. I worked a bit on the matter a week ago, the day following our visit, but then the tempo here, with Homecoming and a lot of meetings the latter part of the week, picked up considerably so I haven't been able to do the writing part until now.

81-7000

and also the friction head. By trial and error, I determined that the velocity would be around 11.5 ft per sec, the friction head about 180 ft (total 205 ft) and the flow about 0.06 cfs.

This quantity is about three times the 0.02 cfs figure.

The above results appear to be reasonable ones for the figures I used. I checked the calculations roughly.

I don't know the nature of your water right but you may be able to adjust your pumping time (keeping careful records) to stay within its quantity limits over some period of time.

Dear Mr. & Mrs. Ruckman:

Thank you for your letter of September 8, 1967. We are again returning your original application No. 81-7000. Possibly you could obtain assistance in clarifying the location of the point of diversion and the place of use from the forest service or another federal agency.

The map you have submitted indicates that the lands irrigated are located in the N $\frac{1}{2}$ NW $\frac{1}{4}$, Sec. 2. The point of diversion listed is shown as being in SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 3; however, this has not been indicated on the map. Therefore, before we can proceed with the processing of your application, we must have clarification both under question 3, the point of diversion, and question 8, the land list and the map found under question 11 of the application.

Your prompt attention to this matter will be appreciated.

Dear Sirs:

In answer to your inquiry as to the location of our property — we purchased a ten acre tract from J. P. Bunnell — since the frontage parallels the river which, at this point runs in a north-easterly by south westerly direction, our plot extends diagonally across two forties. Most of the land is either bench land or timber and can not be irrigated but we'd like water

Dear Mr. & Mrs. Ruckman:

We have receipted your check for the amount of \$10.00 as application fee for permit to appropriate the public waters of the State of Idaho.

However, before we can continue processing your application, you are requested to clarify the place of use of the water. The land list you have entered under 8b., shows that part of your 3 acres is located in SW $\frac{1}{4}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 2; SE $\frac{1}{4}$ NE $\frac{1}{4}$, NE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 3, T. 32 N, R. 5 E, B.M. It seems difficult to believe that your land could be spread over such a distance and still have only 3 acres. The law requires that a map be submitted with your application; therefore, we are returning your original application for clarification.

We have kept a copy of the application and will await your clarification of the issues. Possibly a federal agricultural agency could assist you in identifying the legal description of the property and in completing the map. Your prompt attention to this matter will be appreciated.
