Re: Permit No. 31071; 31072

Date:

USDA, Forest Service
Bitterroot National Forest
Hamilton, Montana

Dear Sirs:

Under the terms of your Permit No. 31072 you are required to make proofs of completion of works and application of water to beneficial use on or before April 8, 1964.

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper in the county.

We enclose Form 36-A in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, for what purpose it is used, the point of points of diversion and the location of use or lands which are irrigated - - by legal description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 36-A.

At the time we send the notice to the newspaper we will send you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set and at the place named, before the Notary Public as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by the field inspection to have been irrigated at the time of proof.

Re: Applications for Permit

Forest Supervisor
Bitterroot National Forest
Hamilton, Montana

Dear Sir:

Returned herewith are the two applications we received today.

Both applications should be signed by agent on page 3. The amounts of water claimed appear to be excessive, however the amount allowable on the water licenses will be determined by the field examination.

The application to divert water from Paradise Spring, answer under 6 (a) does not seem to check the maps which show the point of use of the water in unsurveyed NE $\frac{1}{4}$ SW $\frac{1}{4}$, Section 9.

The fees are \$5.00 for each application.

Very truly yours,

GEO. N. CARTER
State Reclamation Engineer
