Re: Permit No. 32854/85-2136

Mr. and Mrs. W. E. Slasor  
Star Route  
Kooskia, Idaho

Dear Mr. and Mrs. Slasor:

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof and relieve the permit holder from making separate proofs of completion of works and beneficial use of water.

The enclosed order modifies your permit to comply with these rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a paper as prescribed by the Department; previously, a permit holder had to publish a notice for four weeks when he submitted proof under his permit.

If you will complete the enclosed forms, we will cause the notice to be published. Should you require additional forms or information, we will be glad to supply them upon request at any time.

Very truly yours,

Dear Mr. Slasor:

In reviewing your application we feel that the amount of water requested would not be sufficient to run your sprinkler system. Since the state statutes say you are allowed 1 inch per acre the only way we can allow more than that amount is by having a request from the applicant stating the reason for the larger amount. Therefore, if you will forward a letter requesting that the amount of water on your application be increased to .44 c.f.s. to insure the proper functioning of your sprinkler system, we will approve the application for that amount. This amount is computed by 200 gallons per minute pumping at less than 70% efficiency using 40' X 60' sets using 15, 10 gallon per minute sprinkler heads, requiring .44 c.f.s. or 22".

Your prompt attention to the above matter will be appreciated.

Very truly yours,

M. RUSSELL BOSCH
