ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 85-7515, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before March 1, 19 90.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other:

The issuance of this permit in no way grants any right-of-way or easement across the land of another.

The maximum rate of diversion for irrigation purposes under this permit shall not exceed 0.02 cfs.

Dear Mr. Evett:

Dear Permitholder:

We acknowledge receipt of your statement of completion of water development use for the above-referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We do not know at this time when he will be able to conduct the examination; however, the examiner will try to contact you prior to the time the examination is made so that you may demonstrate the system. If you will not be available to show the system, please provide this office with the name and address of someone who will be able to do so. Your permit will remain valid until the examination is made.

If you have any questions concerning the field examination, please contact this office. Please be sure to use the above-referenced permit number in all future correspondence concerning this examination.

Dear Applicant:

The Department of Water Resources acknowledges receipt of your water right application for permit.

This office is currently in the process of advertising the application in the local county newspaper. The advertisement will be published for two weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to the final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Enclosed please find your receipt for the fee involved in filing this application.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

ROBERT G. HAYNES, P.E.

Re: Appropriation Application

Dear Applicant:

This office is in receipt of your check #92-6 55 in the amount of \$30.00 and your application to develop a water right by appropriation of water from Big Canyon Creek which is a tributary of the Clearwater River, however the application can not be processed since it is incomplete. I am returning your check and application to allow you to complete or clarify the following items.

Item #3: The legal description of the point of diversion must be described by 40 acre parcel (for example ... NE $\frac{1}{4}$ SW $\frac{1}{4}$) Section, Township and Range as established by the public land survey and shown in the instructions.

Item #4: The usual diversion rate for irrigation is 0.02 cfs per acre of irrigated lands (0.03 cfs/acre if the total acreage is less than five acres). You may file for more than this amount for irrigation purposes if you wish, but it may not be approved unless you provide evidence that the excess water is needed. To seek approval for the excess flow for irrigation purposes, you must complete the enclosed fact sheet for excessive irrigation flows.

Item #5: Please total the diversion rate in cfs (acre feet are used only when storage is being applied for).

Item #9: This item must be completed in accordance with the enclosed instructions.

Item #10: Describe any other water right you possess, by number if possible.

Item #11: This item is in three parts, if the applicant does not own the property at either the point of diversion (part a.) or where the water is to be used (part b.) then part c. must be completed by describing the arrangements which allow the applicant to make this filing.

Item #13: I have taken the liberty of preparing a map, which will allow you to show where the water is to be removed from the stream and where the irrigation is to take place.

If you have any questions or if I can be of any assistance please feel free to contact me at this office.

Sincerely,
