WATER RIGHT LICENSE

WATER RIGHT NO. 85-07495

Priority: August 12, 1988

Maximum Diversion Rate:

0.04 CFS

Maximum Diversion Volume:¹

0.1 AF

This is to certify, that GERALD ALM
RT. 1 BOX 7

GRANGEVILLE, ID 83530

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated August 12, 1988; and has submitted Proof of Beneficial Use on February 13, 1989. An examination indicates that the works have a diversion capacity of .040 cfs of water from a GROUNDWATER source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
COMMERCIAL	01/01 to 12/31	0.04 CFS	0.1 AF

LOCATION OF POINT(S) OF DIVERSION:

SWSW , Sec. 4, Township 30N, Range 02E
IDAHO County

PLACE OF USE: COMMERCIAL
TWN RGE SEC

30N 02E 4 SWSW

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Commercial use is for agricultural spraying.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 21ST day of AUGUST, 1991.

APPLICATION FOR PERMIT

Ident. No. 85-7495

To appropriate the public waters of the State of Idaho

APPROVED

1. Name of applicant Gerald Alm Phone 208/983-0313

Post office address Route 1, Box 7, Grangeville, Idaho 83530

2. Source of water supply Ground water which is a tributary of _____

3. Location of point of diversion is SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of SW $\frac{1}{4}$, Govt. Lot _____

Sec. 4 Township 30N Range 2E B.M. Idaho County; additional
points of diversion if any: _____

4. Water will be used for the following purposes:

Amount .04 for commercial * Agriculture spraying purposes from Jan. 1 to Dec. 31 (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

5. Total quantity to be appropriated is (a) .04 and/or (b) _____
cubic feet per second acre feet per annum

*kw 11/29/88

6. Proposed diverting works:

a. Description of ditches, flumes, pumps, headgates, etc. pump

b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total
reservoir capacity _____ acre-feet; period of year when water will be diverted to storage:
_____ to _____ inclusive.

c. Proposed well diameter is 8 inches; proposed depth of well is 410 feet.

d. Is ground water with a temperature of greater than 90°F being sought? No

7. Time required for the completion of the works and application of the water to the proposed beneficial use is
5 years (minimum 1 year).

MICROFILMED

DEC 21 1988

8. Description of proposed uses (if irrigation only, go to item 9):

- a. Hydropower; show total feet of head and proposed capacity in KW. _____
- b. Stockwatering; list number and kind of livestock. _____
- c. Municipal; show name of municipality. _____
- d. Domestic; show number of households. _____
- e. Other; describe fully. Commercial use of Agriculture Spraying

9. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: *D* for *Domestic*) in the corresponding place of use below. See instructions for standard symbols.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 85-7495, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before December 1, 19 90.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other:

Permit holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.

Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

Witness my hand this 30th day of November, 1988.

Re: 85-7495

Dear Water User:

We have recently completed processing in our office of the exam on your permit to use groundwater. Our report has been sent to our state office and you should receive your water right license in the near future. In a search of our records, we were unable to identify a well log for your well. The well driller who constructed the well is required as a condition of his driller's license to submit a log for every well he drills.

Would you please supply us with any of the following information you may have:

1. A copy of the well driller's report, if you have a copy in your possession.
2. The names of any previous owners of the property, in case the well driller's report was filed under a previous owner's name.
3. The name of the well drilling firm that drilled your well, and the name of the owner of the property at the time the well was drilled.

By providing us with as much of the above information as possible, we will have a more complete record of the pertinent items relative to your water right. Having this information in our files may prove to be of value to you or a subsequent owner.

If you have any questions, please do not hesitate to contact this office.

Sincerely,

ROBERT G. HAYNES, P.E.

Re: 85-7495

Dear Applicant:

We acknowledge receipt of your statement of completion of water development use for the above-referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We do not know at this time when he will be able to conduct the examination; however, the examiner will try to contact you prior to the time the examination is made so that you may demonstrate the system. If you will not be available to show the system, please provide this office with the name and address of someone who will be able to do so. Your permit will remain valid until the examination is made.

If you have any questions concerning the field examination, please contact this office. Please be sure to use the above-referenced permit number in all future correspondence concerning this examination.

Sincerely,

/s/

RE: Permit to appropriate water no. 85-07495

Dear Mr. Alm:

I have reviewed the file for permit no. 85-7495. In August, 1988, you filed an application for permit to appropriate water with the Department of Water Resources. It was assigned application no. 85-7495, and was advertised in the Idaho County Free Press. It was then forwarded to the Boise office of the Department of Water Resources for final approval. You must have received the approved application or permit from the department.

You represent that the system has been in use for several years, and question the need for drilling permit. I agree that a drilling permit is not required if the well was drilled prior to July 1, 1987. The application did not state, however, whether the well was already drilled. Not knowing that development was complete, we imposed a drilling permit condition on the permit to appropriate water.

If the well is already drilled and the permit issued to you is satisfactory, I suggest that you file proof of beneficial use with the department immediately.

Sincerely,

Gary Spackman, Manager
Water Rights Permits Section

Dear Mr. Spackman,

In regards to Permit #85-07495

I'm wondering if there hasn't been a mistake made with regards to this well.
It has been in use for several years.

It seems as tho this paper work is telling me I may now drill a new well.

Please advise.

Perhaps your office sent us the wrong forms.

Sincerely,

Gerald Alm

UNITED STATES OF AMERICA
FEDERAL ENERGY REGULATORY COMMISSION

City of Idaho Falls, Idaho)

Department of Water Resources
Project No. 2842-015

NOTICE EXTENDING DEADLINE

(December 27, 1988)

By order issued October 7, 1988, 1/ the Commission denied the appeal of the licensee, City of Idaho Falls, Idaho, challenging the order, issued June 24, 1988, 2/ by the Director, Division of Project Compliance and Administration, which denied licensee's request to eliminate a requirement for seasonal installation of buoy lines at Project No. 2842. The Commission's order also directed the licensee to file, by November 7, 1988, (after consultation with the Sheriff of Bonneville County, Idaho) either a request to change the location of the buoy lines, with appropriately revised Exhibit R drawings and supporting evidence, or a letter stating that no change in the buoy-line locations is needed. By notice issued November 15, 1988, licensee's request, filed November 1, 1988, to extend the November 7 deadline 45 days to December 22, 1988, was granted.

On December 20, 1988, licensee filed a request for a 30-day extension, to January 23, 1989, of the previously-extended deadline for filing the required information. Licensee contends that it has filed a request for rehearing of the Commission's order, and therefore, the buoy line requirement may be removed. Because the requested extension will not delay the installation of the buoy lines, as required by the Commission's order, licensee's extension request will be granted and notice is hereby given, nunc pro tunc, that licensee must file the required information by January 23, 1989.

However, disposition of licensee's rehearing request is not a condition precedent to the filing of the required information. Thus, any further extension requests based on the pendency of licensee's rehearing request will not be viewed favorably, and licensee is hereby admonished to act in good faith to meet the new deadline for filing the required information.

Linwood A. Watson, Jr.
Acting Secretary

Bonneville Pacific Corporation Project No. 6015-024
Idaho

ORDER AMENDING LICENSE

(Issued December 23, 1988)

On November 7, 1988, the Bonneville Pacific Corporation (licensee) filed a request to change the location and design of the diversion structure for the Rock Creek II Project. The licensee states that it must relocate the diversion structure approximately 130 feet downstream because excavation at the licensee-approved site is extremely difficult due to rock formations.

In letters dated November 2 and November 3, 1988, the Idaho Department of Fish and Game and the U.S. Fish and Wildlife Service, respectively, concur with the licensee's proposal.

Locating the diversion structure, as proposed, would not cause adverse impacts beyond those identified in the environmental assessment (EA) 1, prepared for the August 29, 1986, license, provided the licensee adheres to the conditions in that document.

Although this order approves the licensee's request to construct the diversion structure at a location downstream of the licensee-approved site, the licensee, prior to the date of this order, had no prior authority to deviate from the license. Nevertheless, on December 8, 1988, the Commission's Portland Regional Office reported that the licensee was constructing the diversion structure approximately 130 feet downstream of the licensee-approved site.

By substantially changing the location of the diversion structure without Commission approval, the licensee violated standard article 2 of its license. The licensee is put on notice that violation of standard article 2 subjects the licensee to the enforcement and penalty provisions of section 31 of the Federal Power Act. This amendment does not affect possible remedies or penalties for violations that have already occurred.

1/ Environmental assessment, Rock Creek II Project, Application for License, FERC Project No. 6015-007, Federal Energy Regulatory Commission, dated March 28, 1986. This document is available in the Commission's public files associated with the proceeding.

Department of Water Resources

The Director orders:

- (A) Page 13 of the revised Exhibit F-7(a) drawing filed on November 7, 1988, depicting the proposed location of the diversion structure is approved and supersedes the previously approved Exhibit F-7(a).
- (B) Page 17 of the revised Exhibit F-10 drawing filed on November 7, 1988, depicting the modified design of the diversion structure is approved and supersedes the previously approved Exhibit F-10. Within 3 months of completion of the diversion structure, the licensee must file as-built drawings of that structure.
- (C) Issuance of this order does not preclude the Commission from taking actions, relative to the violation of standard article 2, under section 31 of the Federal Power Act.
- (D) This order is issued under authority delegated to the Director and is final unless appealed under Rule 1902 to the Commission by any party within 30 days from the issuance date of this order. Filing an appeal does not stay the effective date of this order or any data submittal specified in this order. The licensee's failure to appeal this order shall constitute acceptance of this order.

RE: PERMIT NO. 85-07495

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of
