CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to reflect cropping patterns or acceptable standards of water delivery efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre for the lands above.

RE: 85-7320

Dear Sir:

We acknowledge receipt of your statement of completion of water development use for the above-referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We do not know at this time when he will be able to conduct the examination; however, the examiner will try to contact you at the time he makes the examination so that you may show him the system. If you will not be available to show the system, please provide this office with the name and address of someone who will be able to do so. Your permit will remain valid until the examination is made.

If you have any questions concerning the field examination, please contact this office. Please be sure to use the above-referenced permit number in all future correspondence concerning this examination.

Sincerely,

/s/

Dear Mr. Gray:

Re: Permit No. 85-7320

On February 19, 1988, I wrote to you and requested you review a copy of the permit and proof of beneficial use form submitted to this office.

From the proof you submitted in January, it is difficult to determine if you have completed the project; in which case, the department will accept a properly executed proof form and fee for the existing development or whether you intend to put the remaining acreage under irrigation; in which case, you should have submitted a request for extension of time form and fee. There is also a statement on the proof: "not diverted out of well". Does this mean that you never drilled a well(s) to establish a ground water use? If this is the case this permit should probably lapse.

Action is required on this permit. If you are confused and have questions, please feel free to contact me. I will be glad to discuss this matter with you. Please advise me on this matter by May 1, 1988.

Sincerely,

RITA I. FLECK

Dear Mr. Gray:

Re: Permit No. 85-7320

Enclosed is a copy your water right permit and a new proof of beneficial use form and fee schedule/instruction sheet.

Please review the permit. Determine what uses as proposed by the permit have been completed, and if further uses will be developed. If no further development will take place, then complete the proof form indicating only those uses which have been developed. Now, determine when the well was drilled or when you started using the water. Indicate the date on the proof form. Next, if you know the amount of water the well produces, indicate that on the form. (Nine gallons a minute equals 0.02 cubic feet per second). Based on the diversion rate, determine if a fee is required to complete a field inspection. See the fee schedule on the back of the instruction sheet. Return the proof form and fee, promptly.

If you intend to complete future development, I suggest you withdraw the proof form and request an extension of time. This request if granted, would allow you an additional period of time in which to complete the project under this permit.

I know this information can be difficult to interpret and supply at times. I will be very happy to assist you with any questions you might have.

Sincerely,

RITA I. FLECK
Secretary/Records Manager

PROOF DUE NOTICE

RE: Permit No. 85-7320

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before February 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK
Secretary/Records Manager
