Re: 85-7275

I regret to inform you that Permit No. 85-7275 was approved for only one acre foot. Consequentially, it can only be licensed for one acre foot.

To develop a water right for the additional seven acre feet of storage, you must file a new Application for Permit.

Sincerely,

Dear Mr. Seubert:

I am returning your Check No. 92-119 in the amount of \$35.00 and your Application for Permit for additional information.

In Item No. 4, you must also list the rate of diversion to storage for fish production in cubic feet per second as well as the amount of storage as it is now listed.

If you are proposing a commercial venture in fish production and the diversion rate to storage is 1.0 cubic feet per second or greater, you must also furnish proof of ownership of the point of diversion and place of use as well as a construction plan which includes the sizes and number of ponds and the total proposed facility volume of fish. If the diversion rate is less than 1.0 c.f.s., you must list in Item No. 8.a.5. the total poundage of fish to be reared.

If you plan to raise fish for your own consumption, you should list "Recreation" purposes in Item No. 4, and state in Item No. 8.a.5. "Recreation ~~for~~ Fish Production."

The rate of diversion for livestock purposes for 200 head of stock seems excessive, since 0.05 c.f.s. is the typical amount needed for 200 head of stock. Please complete Item NO. 6.1. bearing in mind that stock drinking from the stream does not constitute a water right.
