Dear Permit Holder:

We acknowledge receipt of your statement submitted as proof of beneficial use for the above referenced permit.

Before a Water Right License can be issued, a field examination must be made by a representative of this department.

A field examiner will contact you to arrange to examine your system.

If you have any questions regarding the field examination, please contact this office by phone or in person.

Dear Mr. Yates:

Re: Permit No. 85-7270

Persuant to our telephone conversation today, I have changed the proof of beneficial use form submitted for the above-referenced permit to reflect the actual use of water for four acres of irrigation and a maximum rate of diversion claimed as 0.12. The change in the rate of flow also changes the fee the department will charge as the field examination fee from \$100 to \$50.

I've requested our accounting staff refund \$50 of the \$100 fee submitted with the proof of beneficial use form. Please allow several weeks for processing this request.

If you have any questions concerning this matter, please feel free to contact this office.

RE:

Proof of Beneficial Use

The Proof of Beneficial use shows the total number of acres being irrigated as 3 and the total rate diverted as 0.24. Based on this rate, the permit holder submitted an exam fee of \$100.

I contacted Mr. Yates, Superintendent for this School District, to find out if maybe an extension was needed to develop the additional acres. Or, maybe the school district would want to amend the total rate of diversion to the maximum amount which could be licensed for 3 acres. If this were the case, a refund of \$50.00 would be necessary ~~since~~ the total rate would be .06 cfs.

Upon discussing the situation with Mr. Yates, he wishes to amend the Proof to show a total of 4 acres irrigated and the maximum for this number of irrigated for which a license could be issued - 0.08. The fee for 0.08 is \$50.

I advised Mr. Yates that the Dept. would make a \$50. refund.

Dear Mr. Barton:

Interpretation of legal descriptions in the Kamiah area has always been for me an exercise in mental gymnastics. The method of sectional subdivision is very unique which creates considerable confusion especially when attempting to modify that information to fit the parameters of the Departmental forms. Unfortunately, this has created some discrepancies in your Application for Permit. I have, therefore, taken the liberty of preparing a new application for your signature, which I am enclosing along with your original application and Check No. 92-308 in the amount of \$45.00.

In view of your description of the source, I have changed Item No. 2 from "groundwater" to "spring". The location of the spring, however, is a little tricky. As I indicated in Item No. 10, it appears to lie very close to the lot line common to Lots 6 and 11. By measuring the distance to the spring (as located on the drawing by C. J. Bellamy & Co.) from the property line, the spring appears to lie within Gov. Lot No. 6 (NENW). If you feel that the spring is actually within Gov. Lot No. 11 (SEnw), please do not hesitate to change the description, since any change to the application after it has been filed requires an Amendment and an additional \$20.00 fee.

When determining the amount of land to be irrigated, I used the measurements of the property as shown on the "Bellamy" drawing, deleting the bleachers, parking lot, etc. I found a total of approximately 12 acres of ground susceptable to irrigation. Since the maximum allowable diversion rate for irrigation is 0.02 cfs per acre of irrigated land, this subsequently reduces Item Nos. 4 and 5.a. to 0.24 cfs (approximately 112 g.p.m.).

Gentlemen:

We are returning your Check No. 92-308 in the amount of \$45.00 and your Application for Permit for clarification and additional information.

Item #2 - This item indicates the source is to be groundwater, yet Items #6.a. and #10 refer to a spring. If the source is a spring, Item #2 should state "Spring". If the spring sinks back into the ground without joining another body of water, the word "Sink~~ss~~" should be listed as the tributary. If the spring flows into a stream, the stream should be listed as the tributary.

Item #7 - This item indicates the length of time needed to develop the spring, complete the irrigation system, and irrigate the property. A period of at least one year is necessary for this Department to discharge the statutory duties inherent in the permit process.

Item #8c - If any other water is used to irrigate the property, please describe that water source. If there is none, please so indicate.

Item #11 - It is not possible to accurately locate your property from the sketch. You must show at least two reference points, preferably two contiguous section corners. You must also show the location of the spring. You mention an attached map, but a map was not attached.

If you have any questions, please contact me at this office.

Re: 85-7270

Gentlemen:

Enclosed is a Notice of Correction for the above-referenced permit.

Please publish the Notice of Correction on August 27 and September 3, 1981, and forward your Affidavit of Publication. If you cannot publish on these dates, please contact me immediately, since this will change the wording in the notice.

We ask that you do not bill us for this second publishing since the error was not ours. We are holding the bill for the first publication and will submit ~~to~~ for payment when we receive your Affidavit. Thank you for your cooperation.

Sincerely,

Patricia M. Stypa
Sr. Secretary
