RE: RECOMMENDATION FOR LICENSING

DATE: 02 FEB 1988

During the review of the field exam it was found that the examiner recommended an amendment to change the source under this permit.

At the time of the examination the policy of the Dept. was to require amendments for source changes, however, recent interpretations of the amendment statutes have determined that source changes cannot be allowed.

In this particular circumstance the source is not being changed but rather it is being corrected to correspond with the USGS quadrangle map description.

An amendment should not be required and the license should be issued.
