Dear Mr. Estis:

We received your December 5 letter concerning Permit No. 85-7049 which was originally in the name of Orvil Chase.

We also received a letter from Orvil Chase which may have assigned this permit to you; but to remove any doubt, we have forwarded an assignment form to him in which he would convey his interest in this permit to you.

Enclosed is an application of beneficial use form which you should complete by describing the project as it has been constructed. This proof of beneficial use must be completed and returned to us prior to January 1, 1978 to avoid the lapsing of this permit.

We are also returning for your records, your copy of Permit No. 85-7049. If you have any questions, please let us know.

Sincerely,

BOBBY D. FLEENOR

Dear Mr. Chase:

One of the conditions of approval of your water Permit No. 85-7049 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before January 1, 1978. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr. Chase:

In reviewing your application for permit, we find several items which need clarification. We have taken the liberty of re-typing your application.

Please note that we have reduced the amount of water you have requested under Items 4 and 5a to 0.08 cubic feet per second. This is the maximum allowable of 0.02 c.f.s. per irrigated acre, unless you can justify the need for more. 0.08 c.f.s. is equivalent to 36 gallons per minute and should be more than an adequate amount to irrigate 4 acres.

Please review all items on our typed application, and if you are in agreement, please sign at the bottom of Page 3 and return the application to our office along with the \$10 filing fee, and we shall begin its processing.

If you should have any questions, please feel free to contact this office.
