INSTRUCTIONS

Your claim should set forth all necessary information to describe your claimed right. Failure to give enough information may make your claim of little value. Some of the items in the form may not apply to your situation. Please use additional sheets if space provided is not sufficient to fully answer the questions.

Paragraph No.

1. Give full name and post office address of person or company making the claim.
2. Describe the point of diversion by 40-acre subdivision. Give the name of the source, the drainage to which it is tributary if surface water, and the county in which the point of diversion is located. If there is more than one point of diversion, list others in the remarks section.
3. Give the priority dates and the quantities of water that you claim. You should accurately list the dates that you initiated each new use of the water. List separately the dates and amounts of water involved in each enlargement of the diversion. (Example: if you diverted 0.8 c.f.s. of water for irrigation on May 18, 1871, for the first time for use on 40 acres of land, and then later you enlarged the diversion by diverting an additional 0.4 c.f.s. of water to irrigate an additional 20 acres of land on June 1, 1901, your right should be described as follows:

Date of priority claimed:	<u>May 18, 1871</u>	amount:	<u>0.8</u> c.f.s. or	_____	acre feet
	<u>June 1, 1901</u>	amount:	<u>0.4</u> c.f.s. or	_____	acre feet
		Total claimed:	<u>1.2</u> c.f.s. or	_____	acre feet

Since the water was used for irrigation between April 1 and October 31 on that particular farm, part b. would be completed as follows:

- use irrigation period of use from April 1 to October 31 (both dates inclusive). If the water had been used for any other purpose, you would have described the priority date, amount, use, and period of use in a similar manner.
4. Describe the diversion works and explain any changes since the right was first initiated.
 5. If the water is used for irrigation, give the total acreage and list the lands irrigated by 40-acre subdivisions and complete the other questions.
 - 6, 7, & 8. Describe any other uses of water.
 9. In the remarks section, give any information or details that you feel are not fully covered or that need clarifying. You might explain your operation, where the water is returned to if for an industrial or non-consumptive right, the condition and temperature of the returned water, and any other information to help explain your claim.

You may wish to include as a part of your claim, affidavits of witnesses who are familiar with your right and who have a personal knowledge of the circumstances which you have described in your claim. You may submit maps, drawings, certified copies of posted notices which may have been filed in the county courthouse, water measurement records, or any other document which you feel will support your claim.

Your claim will be advertised in a county newspaper for two weeks. Exceptions to your claim which dispute the water right that you have described may be received by the Department of Reclamation and you will be provided a copy of such exceptions.

The fee for filing this claim with the Department of Reclamation, Room 107, Statehouse, Boise, Idaho 83701, is \$10.00.

Dear Mr. Estis,

The spring you refer to has been used continuously since 1934, for the house and yard, as well as for irrigating the family garden. In the beginning, my folks carried water from the spring below the house but that was so much trouble that Dad gave piping water to the house first priority, and actually I'm sure it was done before 1934, as they moved there in 1931, but it was certainly no later than 1934. And it has never been out of use until last year when the pipe was broken and filled with mud, through accident.

RE: New Property Owner
Change of Water Right

Dear Ms. Miller:

Enclosed is a photocopy of your letter of February 10, 1992, addressed to Steve Tutsie of Titusville, Florida, concerning Permit No. 79-07189. We received the original of this letter at our home in Petaluma, California, on Friday, February 14, 1992.

My husband and I recently bought property near Kamiah, Idaho. On or about February 3, 1992, we sent to you our New Property Owner Notice of Change of Water Right Ownership (copy enclosed). The Water Right Number shown thereon was 85-4010 (amended 11-3-'76).

I suspect that Mr. Tutsie sent you a similar form at about the same time as we did and that your confirming letters were simply put into the wrong envelopes. Nevertheless, just for our peace of mind and to keep our files correct, we would appreciate it if you would send us a letter confirming that our water rights under Water Right Number 85-4010 are correctly entered in your computer.

Thank you for your attention to this matter.

Yours very truly,

Lona Berry

In reference to your letter of Oct. 25, 1976, RE: Claim to a water right no. 85-4010.

The reduction in acreage resulted from a proper survey, after the survey the land was split equally between Mr. Estis and myself with me retaining the property with the water right on it. The spring will now be used on only the 12+ acres. Mr. Estis has since filed for a water right on a spring on the other half of the original property.

I trust this is the information needed by your office as per your letter.

Dear Mr. Grigg:

Your letter of September 27, 1976, has been forwarded to the Northern Regional Office of the Department of Water Resources for reply.

You mentioned that the land has been divided and that Mr. Estes no longer has any interest in the water right Claim No. 85-4010. Before we can determine the proper way to protect your water right, we need to know whether you have ceased to use the water on part of the property originally described, or if the reduction in acreage merely represents a more accurate account of the actual acreage irrigated.

If you would respond to this question by return mail, we would be happy to inform you of the steps necessary to protect your water right.
