To Bud G. Deye
Peek, Idaho.

It appearing to the State Reclamation Engineer that the terms and conditions of Permit No. 31933
to appropriate the Public Waters of the State of Idaho, have not been complied with as to
Completion of Works and Beneficial Use Proofs which were due June 12, 1965

you are hereby notified in compliance with Sec. 42-311, Idaho code that said Permit No. 31933
is hereby held for cancellation.

You are hereby required to show cause before the State Reclamation Engineer on or before forty days from
date of this notice why said Permit should not be cancelled.

Said Permit No. 31933 claims the use of .03 cubic feet per second of the
waters of Bear Creek with point of diversion located
NW 1/4 SW 1/4, Sec. 11, Twp. 36 N., Rge. 1 W.B.M., Nez Perce County, and
was approved June 12, 1964

In Witness Whereof, I have hereunto set my hand and affixed the seal of my office at Boise, Idaho, the

Lewiston, Idaho.

Dear Mr. Knowlton:

This acknowledges the Notice of Proof of Completion of Works and Application of Water to Beneficial Use under Permit No. **31933**, in the name of **Bud G. Dayo**. Final Proof is to be made before you, as Notary on the **1st** day of **October**, 19 **64**, at **10:00** o'clock **A.M.**, at **303 Breier Building, Lewiston, Idaho**, Idaho.

As of this date, we have mailed the Notice to the **Lewiston Morning Tribune**, **Lewiston, Idaho**, with instructions to publish it once a week for **3** consecutive weeks prior to the date set for final proof and then mail the Affidavit of Publication and statement of costs to you.

It is important that the enclosed depositions be executed by the permit holder and two disinterested witnesses who are familiar with the terms of the permit and the work done thereunder, at the time, on the date and before you, as Notary, as stated in the publication notice. It is very important and necessary that each question be answered in detail.

In returning the depositions to this office, be sure that all copies have been signed, that your Notary's seal has been placed on each and that all depositions, (holder and two witnesses) are being returned. Also be sure to enclose the AFFIDAVIT OF PUBLICATION.

Very truly yours,

Dear Mr. Knowlton:

We received your letter of June 1 in regard to the application for permit.

Idaho Code 42-202 describes the application which has been transferred to the Regulations and Instructions, which we probably sent to you.

There are a number of small pumping plants on Canyon Creek and probably a few on Bear Creek. Probably all pump excessive amounts of water, however they do not operate continuously. It is entirely possible that the people will have to arrange for some rotation method of irrigation.

The maximum allowable you mentioned as 9 gallon per minute, is for one acre of irrigable land involved in this application, not of the surrounding area.

Whether Mr. Deyo will have to change his pump will depend upon the water available. The amount pumped can be reduced by using a valve on the discharge pipe. All prior uses of the water will have priority or first claim to the use of the available water

Re: Application for Permit
Bud G. Deyo

Dear Mr. Thomas:

On behalf of Bud G. Deyo, I am making application for water from Bear Creek in the Village of Peck, Nez Perce County, Idaho. I recently submitted the application and it was returned with some different and additional forms to be filled out. In going over the instructions, I ran into some problems. Mr. Deyo has a pump down in Bear Creek, which is a tributary of Big Canyon Creek, which has a capacity of 100 gallons per minute. The water is used solely for irrigation. In making my application, I had asked for .3 cubic feet per second. This would be approximately the capacity of the pump. I note in the instructions, and you have underlined these things in red, that the maximum quantity of water allowable is 1/50 of 1 cubic foot per second or approximately 9 gallon per minute for an acre and one-half. This would come out to 13 1/2 gallons per minute maximum. The applicant, Mr. Deyo, would, of course, probably irrigate once a week and, probably, a total of 30 days during the growing season. The pump could not operate at 13 1/2 gallons per minute. I have been receiving my information on this problem from the manager of the local irrigation district, free gratus I might add, and he states that it may be necessary for Mr. Deyo to get a smaller pump. This, of course, we do not want to do if there is any way out of it as he has already purchased the pump and is irrigating his lawn at the present time.

Another question which I notice must be completed is the number of acres which can be irrigated in the 40 acre section of which the Village of Peck is a subdivision. 3/4 of the Village of Peck lies on a steep hillside and could only be irrigated by some type of a sprinkler system and not very well at that. The rest
