WATER RIGHT LICENSE

WATER RIGHT NO. 29-08068

Priority: May 10, 1991

Maximum Diversion Rate: 0.03 CFS
Maximum Diversion Volume: 4.0 AF

This is to certify, that EVELYN K ROEDER
14585 W LEA
POCATELLO ID 83202

has complied with the terms and conditions
of the permit, issued pursuant to Application for Permit dated May 10, 1991; and
has submitted Proof of Beneficial Use on January 17, 1992. An examination indicates
that the works have a diversion capacity of .040 cfs of water from a GROUNDWATER
source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	04/01 to 10/31	0.03 CFS	4.0 AF

LOCATION OF POINT(S) OF DIVERSION: SESW , Sec. 5, Township 06S, Range 34E

Total number of acres irrigated: 1

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. The use of water under this right shall not give rise to any claim against the holder of a senior water right based upon the theories of forfeiture, abandonment, adverse possession, waiver, equitable estoppel, estoppel by laches or customary preference.
6. The Director retains jurisdiction of the right and any license subsequently issued to incorporate the use into a water district, require streamflow augmentation or other action needed to protect prior surface water and groundwater rights.

Re: Permit No. 29-08068

Dear Permit Holder:

Enclosed is your proof acknowledgement letter on the above referenced permit. While we have accepted the proof of beneficial use, it was necessary to make two changes before doing so.

Please note that your permit to appropriate water was issued for .03 cfs. A license cannot be issued for a rate of diversion that is more than applied for on the permit. Therefore, your proof has been adjusted to read .03 cfs.

You have also indicated the extent of use to include domestic use for one household and stockwater for two horses. This permit was issued for irrigation of one acre only. A search of our database, however, shows that your domestic and stockwater use is covered under another permit, namely permit no. A29-07177. Your proof has also been adjusted to read irrigation use only.

I realize that this can be confusing, so if you have any questions or if I can be of any further assistance, please feel free to contact me.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 29-08068

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed you should complete and submit this form immediately.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

You should be aware that you are located within a drainage basin where surface water diversions are regulated by a watermaster. It is possible that diversion of groundwater under your permit may cause a reduction of surface water flow. Siting your well as far as possible from surface water channels and casing your well so that groundwater tributary to surface water flows are not

JUL 31 1991

diverted will reduce the potential for the watermaster to regulate your water use.

Sincerely,

PAMELA SKAGGS

RE: Application No. 29-08068

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right permit. This office is currently in the process of advertising the application in Idaho State Journal on June 6 & 13, 1991. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

HAROLD W. JONES
Water Rights Supervisor
