RE: Irrigated Acres

=====

Permit No. 29-07862 allowed an appropriation for domestic purposes and for one acre of irrigation. The field examiner found one acre of irrigation, plus 1/2-acre of irrigated lawn associated with the domestic use. Idaho Code §42-111 allows up to 1/2-acre of irrigation to be included in a domestic use. However, to avoid any ambiguity it has been preferable to include the 1/2-acre of lawn, etc., with the irrigation component of a right that includes both domestic and irrigation uses. Otherwise, in the future one may have to guess whether the domestic component of the right includes some irrigation.

Permit No. 29-07862 presents a dilemma. Following our recent practice requires listing 1.5 acres of irrigation, even though it exceeds the face of the permit, which listed only one acre to be irrigated. In my opinion, the difference is cosmetic, not substantial. Therefore, I recommend that the license be issued for 1.5 acres of irrigation. The remarks on the license should indicate that the domestic component does not include irrigation water for a lawn, garden, etc. In this way, there will be no confusion in any future interpretation of the license.

TO: File 29-07862 / LDS Church - Virginia Ward
FROM: Brenda Chapman
DATE: March 21, 1995
RE: Recommendation Adjustment(s)

=====

The final licensing recommendations for the above referenced water right are based on the information below:

F. FLOW CALCULATIONS

The $\frac{1}{2}$ acre of lawn surrounding the church has been added to the irrigated acres for a total of 1.5 acres. The recommended irrigation rate has been increased to the capacity of .04 cfs. This adjustment is based on the current guidelines for processing combination domestic and irrigation rights.

The domestic rate has been left at the higher rate because the church's instantaneous demand may require that rate of flow.

G. VOLUME CALCULATIONS

The volume recommendations have been adjusted accordingly based on the information in Section F. They are addressed in the remarks based on current supplemental groundwater processing procedures.

RE: PERMIT NO. P29-07862

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. enclosed for your convenience is a form entitled "Proof of Beneficial Use".

RE: Application for Permit No. 29-7862, 29-7863, 29-7854, &
29-7865

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right permit. This office is currently in the process of advertising the application in the Idaho State Journal on April 5 & 12, 1990. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

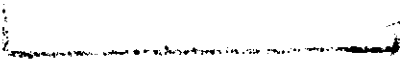

Sincerely,

MICROFILMED
