1. Measurement Calculations

a) Field Measurement Calculations (Include theoretical capacities and system capacity)

0.979 correction factor X 9" meter reading = 8.811

$$(9.75" ID)^2 \times 3.85 \times \sqrt{8.811} = 1086.38 \text{ gpm} \checkmark$$

or 2.42 cfs capacity

Permit allows only 0.91 cfs

b) Volume Calculations for Irrigation:

3.5 AF/AC
214 days

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 76 \text{ acres} \times 3.5 \text{ af/ac} = 266 \text{ af} \checkmark$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 0.91 \text{ cfs} \times 214 \times 1.9835 = 386.3 \text{ AF}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 266 \text{ af}$$

c) Volume Calculations for Other Uses:

$$V = 0.91 \times 1.9835 \times 214 = 386.3 \text{ AF}$$

2. Overlap Review

a) Other water rights with same place of use:

b) Other water rights with same point of diversion:

35-2487

P/D overlap per VAX: 29-7769 & 35-2487 - all copy APPLICATION

c) Analysis:

It appears that the permit (29-7648) did not match the actual irrigation situation. The permit implied that 130 acres total would be under irrigation including the 93 acres from 35-2487. I derived that from the 1.69 cfs on license and 0.91 cfs applied for on the permit. The total of 2.60 cfs would reflect 0.02 cfs/acre for 130 acres. Instead I found 169 acres irrigated. I therefore licensed the 76 acres additional without rights. For the permit allowed 0.91 cfs. Since the total of the two rights would equal 2.6 cfs & the capacity is only 2.42 cfs the condition recommended is R 17 (35-2487) (2.42 cfs) OK your

Dear Mr. Anderson:

Re: Permit No. 29-7648
Application for Permit No. 29-7769

On May 16, 1985, the Department received Form A (Proof of Beneficial Use) submitted in connection with Permit No. 29-7648. Upon review of file 29-7648, I note that proof of beneficial use has already been submitted in the past. I also note, however, that you have an application for permit (29-7769) pending in our Eastern Regional office in Idaho Falls. The application appears to be for the purpose of increasing the rate of diversion on existing irrigated acreage so that the "paperwork" will agree with your past practice. For this reason, I am forwarding the Form A to our Eastern Regional office assuming it is applicable to pending application No. 29-7769 and that Form A was submitted for the purpose of showing that Idaho Power Company's water rights should be considered subordinate to your existing water uses. (Agreement provisions - paragraph 7D).

At this point in time, there is nothing further you need to file with the department.

Sincerely,

L. GLEN SAXTON
Chief, Operations Bureau

Dear Mr. Anderson:

Enclosed is a copy of your Permit No. 29-7648 referenced in your letter of February 15, 1985.

Our records also show you filed an application, No. 29-7769, March 7, 1984, for 0.8 cfs from a groundwater source in the NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 15, T.8S, R.30E. The application has not been approved due to the Swan Falls controversy and is still in our regional office at Idaho Falls. The application identifies the lands to be irrigated as follows:

T.8S, R.30E

Sec. 15: NE $\frac{1}{4}$ SE $\frac{1}{4}$ (40 ac.)
NW $\frac{1}{4}$ SE $\frac{1}{4}$ (40 ac.)

14: NE $\frac{1}{4}$ SW $\frac{1}{4}$ (40 ac.)
NW $\frac{1}{4}$ SW $\frac{1}{4}$ (40 ac.)
SE $\frac{1}{4}$ SW $\frac{1}{4}$ (15 ac.)

I have also enclosed copies of License Nos. 29-2296 (priority date of December 19, 1950) and 35-2487 (priority date of December 20, 1956). The licenses identify the lands or a portion of the lands above described and are not included in the Swan Falls controversy.

Your attorney was correct in advising you to file an application for permit for any increase of water used and/or for any new lands to be developed. This does apply for the use of water conserved through more efficient irrigation means from the same point of diversion used for a prior right; i.e., well.

A new application for permit cannot be "added on" to an existing right with an earlier priority date. The application receives a priority date as of the date actually filed.

Dear Sir:

We now own 170 acres that
belonged to Roy + Don Jaring.
They irrigated about $\frac{1}{2}$ off better
and in 1954 Don drilled the well.
In 1955 he filed on the water.

In 1978 I started putting
sprinklers on to conserve water
and pick up another 30 acres. I
finished this in 1982 and a lawyer
told me I'd have to file for more
water, so I did. Could you please
tell me what he has done and how
many acres.

I have been told wells before
1956 were out of the Swan Falls

Dear Mr. Cavaness:

Enclosed is the application for permit submitted in behalf of Lyle Anderson along with your check #92-141 for \$85.00.

There is already a water right license for the lands in the application. Therefore, the amount of water has been decreased to .02cfs/acre in combination with License #35-2489. This amount decreases the filing fee to \$45.00.

If you have any questions, please feel free to contact me.
