Dear Mr. Sakelaris:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the fourth page.

In November, 1981, a representative of this Department met with waterusers in the Trail Creek Drainage Basin regarding concerns that domestic wells are adversely affected by pumping for irrigation purposes. Therefore, please be advised that groundwater supplies in the area of your proposed well may be limited.

We have enclosed a form entitled "Making Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

MEMORANDUM

TO: File 29-7243

FROM: Norman Young *NW*

DATE: December 14, 1981

RE: Meeting With Groundwater Users in the Trail Creek Basin

During the evening of November 30, 1981, I met with about 25 people who live in the Trail Creek basin who are concerned about groundwater availability. The meeting consisted mainly of a question and answer session on basics of groundwater law in Idaho. Acceptable answers to the problems of overdraft were not readily apparent. The large irrigation well that is the subject of this permit is apparently senior in right to many of the domestic wells in the area. Administration by priority would first prevent pumping by many of the complaining residents of their domestic supply before the large irrigation well owned by Armstrong would be stopped. The only suggested solutions were:

1. Deepen domestic wells - This will be only a temporary solution if withdrawals exceed recharge.
2. Condemnation proceeding against the irrigation right. This is practical only if no cooperative solution can be arranged and if groundwater is the only source of supply for the domestic users.
3. Cooperative solution - Everybody, including the irrigators, use less water to balance supply and demand.

The following actions need to be taken to follow-up on the meeting:

1. Mail copies of letters and forms to those requesting them at the meeting. (Eastern Region will do so.)
2. Make a mass measurement of water levels in the basin during late spring prior to irrigation season. (Eastern Region will do this.)
3. Make periodic measurements of some wells in the basin during the irrigation season. (Water users will do this.)

Dear Mr. Sakelaris:

Enclosed is the claim to a water right that you submitted and check #1682 in the amount of \$20. The claim is being returned because the date of priority is past the mandatory filing date of March 25, 1963 for groundwater, and, therefore, requires that an application for permit be filed.

Domestic purposes is water for household use, or stockwater (up to 1000 head) and irrigation of up to one-half acre of land in connection with said household.

As indicated, it appears that the maximum number of stock would be one horse and one cow. If this is correct, this could also be covered under the domestic purpose, and it would not be necessary to file on your single home domestic well. You may wish to file, therefore, I have enclosed an application for permit with instruction.

Please feel free to contact this office for any additional assistance that may be needed.

Sincerely,

KEITH C. WILSON
Sr. Resource Agent
