RE: Possible interference with existing wells from Application No. 29-7544

This application was received from the Region with the recommendation that it be approved. See note on Permit Analysis Sheet.

Per our conversation, I have reviewed our files for existing rights in the vicinity of the point of diversion described on said application and have found only one other right. This right is a permit for 1.5 cfs for irrigation and is owned by the applicant's father. See copy of Permit No. 29-7407.

Also, I visited with Marc Norton who reviewed the application along with the existing permit.

He stated that volume pumped under the application for domestic use would have very little, if any, affect on groundwater levels in the area. See map for location of new application in relation to Bancroft-Lund Area.

Based upon the above information I don't see why we can't approve this application.

I concur. ART
