MEMORANDUM

TO: File No. 29-7463
FROM: Gary Spackman *Gary*
DATE: April 27, 1988
RE: Volume Limitation for Licensing Purposes
CC: Eastern Region

When the field examiner conducted his examination, he recommended that a license be issued for a volume of 86.9 acre feet annually. In a memorandum dated January 27, 1988, I suggested that the volume and perhaps the flow rate for commercial use were excessive. I requested that the frequency of use and daily hours at the shed be verified, and that the annual volume be calculated accordingly.

The annual volume on the field exam was corrected to an annual volume of 20.6 acre feet annually, which corresponded to continuous diversion for eight hours per day for every working day of the year.

In my opinion, the annual volume is still excessive. In talking to Skip Jones, the field examiner, he stated that he did not think the use would exceed the annual use of a domestic unit. The use of water is for inside domestic use and for occasional washing of vehicles. The annual volume should be changed to be limited to an annual volume of 1.2 acre feet annually.

SUBJECT I realize I checked this exam in the region. After a second review, however, I believe the volume and perhaps the flow rate for commercial are excessive. Please check the frequency of use and daily hours that the shed may be occupied and calculate annual volume accordingly.
