Over two months have expired since you wrote to me requesting a deferment of issuance of an order voiding permit no. 29-7370. You stated that additional information regarding well salvage would be forthcoming.

We will accept any information you may wish to submit that might confirm the validity of your permit. Please be advised, however, that the reason for suggested voiding of the permit is that water from the well was never beneficially used during the development period. Department staff have been told that the well was drilled, but that domestic water could not be extracted therefrom. In order to perfect a water right, a permit holder must show beneficial use of the water during the permit period.

Mr. Spackman,

In answer to your request of a water relinqishment for the permit which the City of McCammon holds, the City would like to request an extension of at least 60 days. We have finally obtained some information that could lead to salvaging the well and would like to ask for enough time to try it to see if it will be beneficial before we relinquish our rights to it.

We have a lot of money invested in this hole in the ground to just let it drop if there is any way possible to get the water out of it without the silt. We know the water is there, but it is a matter of implementing the right way to get it.

We appreciate your co-operation in this matter and will expedite the plans to test this new information.

Sincerely,

Ken Bullock

Re: Permit No. 29-7370

Returned is the Request for Extension of Time form along with your check No. 1426 (92-158/1241) in the amount of $15. I'm returning the extension request since an extension was previously granted based on the provisions of due diligence per Sec. 42-204, Idaho Code.

I suggest that since the well is in and operable that you complete and return the proof of beneficial use form with the filing fee. I understand that you are having some difficulties with the well, but by submitting the proof form the permit can stay current and you can still make alterations to make the well operate better.

Please return the proof form by March 1, 1987 to keep the permit in good standing.

RE: Field Exam for Permit No. 29-7370

During the summer of 1987, Richard Lennon contacted Glade Rowe of McCammon City seeking to conduct a field exam for permit no. 29-7370. He was informed that the pump and well for permit 29-7370 had not been used because it produced sand. Mr. Rowe stated that it would not be used. Richard's notation of the conversation and a written recommendation from you that the permit be canceled was forwarded to the state office. The documentation is being returned to you.

I sent a notice of pending order voiding permit to the city. They responded that they were attempting to repair the well, and requested additional time. They now represent that the well is operational.

In reviewing our file, I believe we should conduct the exam now. A letter in the file, dated February 10, 1987, to the City of McCammon from Rita Fleck could be interpreted to grant additional time. Let's examine it.

RE: Permit to Appropriate Water No. 29-7370

Dear Permit Holders:

NOTICE OF PENDING ORDER VOIDING PERMIT

On March 28, 1977 the Department of Water Resources approved an application to appropriate water, numbered 29-7370, from a groundwater source, for municipal purposes located in the within the city limits of McCammon, B.M.

Based on a field inspection conducted by a representative of our Department it has come to our attention that you have not developed the system you intended under this permit.

The purpose of this letter is to request that you relinquish your permit or explain why the Department should not void the permit. Enclosed is a relinquishment form that should be signed and returned to this office, unless you have some explanation that would prevent the Department from voiding your permit.

If you fail to respond to this notice within thirty (30) days of the date of mailing of this letter, the Department will act to void your permit. The permit will be voided on the grounds that you failed to divert and beneficially use the water that you were permitted to develop.

If you have any questions in regard to this matter, please feel free to contact our office.

Respectfully,

Ms. Fleck,

I am sorry to take so long answering your request of Dec. 31, 1981 and since we had 2 water permits, was confused as to which one you had reference to, so I called the Idaho Falls office. The 2 numbers on the permits are so nearly alike and since the spring project was the one we had been concentrating on, I assumed it was the one you had referred to. On permit #29-7370, which is the well, the project is uncompleted due to lack of funds. We have the well drilled, but since we had to go much deeper than we had anticipated, it depleted our funds, so all we have is a capped hole in the ground. I do not know when we will be able to resume work on this project, so I assume we do need to apply for an extension of time. Please advise.

Thank you.

Mr. Tuthill,

I am writing regarding a letter the City of McCammon received recently, pertaining to the installation of a measuring device on permit No. 29-7370 which was issued to the City of McCammon for a well. This is to inform you, that this well has not been put into service as yet. We had to drill a lot farther than we had anticipated and consquently ran out of money before the pump could be installed.

Please be advised that when and if the pump is implemented, the device will be installed.

Thank you for your interest.

Sincerely,

Helen M. Bullock
