

MEMORANDUM

DATE: September 9, 2003

TO: Water Right File 29-7334

FROM: Shelley W. Keen SWK

RE: Proposed change in place of use

This afternoon Loren Jelbert of Sunrise Engineering in Boise called me to ask about the possibility of the City of Arimo changing the place of use for this water right to include Marsh Valley School District property located about 1.7 miles outside the city limits of Arimo. After some research, I informed Mr. Jelbert that the place of use could be changed without an application for transfer. Transfer Processing Memo #24 says, on page 4, "An application for transfer is not required to change or add a place of use for 'municipal purposes' within the 'service area' of a 'municipal provider.'" Instead of a transfer application, I suggested that the city submit to IDWR evidence that the area to be served is "within the municipality's established planning area" as required under §42-202B, *Idaho Code*. Municipalities are required to prepare comprehensive plans under Title 67, Chapter 65, *Idaho Code*. I also asked for a map or GIS shapefile of Arimo's proposed new service area. The information provided should be used to update both the water right and SRBA claim records.

Dear Steve:

As requested, we have measured the flow of water discharging from a five-inch pipe on your city water system.

The rate of flow that was measured on August 31, 1981 was 50 gallons per minute. You might want to consider that this flow probably is lower than normal and may want to make some compensation for that on your application.

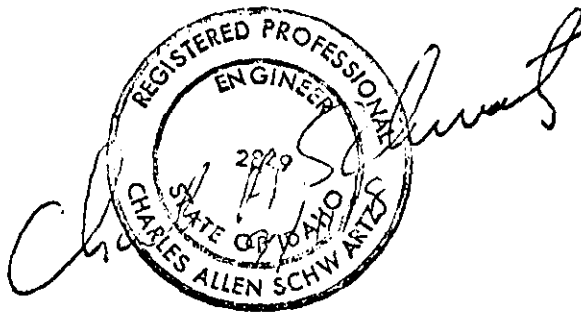

We appreciate this opportunity to serve you. If you have any questions on this matter, or others, please feel free to contact me at any time.

Item 9a, we are assuming you own the land where the well will be located.

Item 11, we have drawn the city limits of Arimo and indicated the sections to and including section 11. Please indicate the well by placing an "x" in the 40-acre subdivision and show the route of the pipeline to Arimo. Attached is a copy of a portion of a 7½ minute Topo map that may be helpful in routing the pipeline.
