RE: I discussed the field exam w/ Harold
per request by Dave T.

Harold stated that at the time
he made the field exam the fields that
are in question were not being irrigated, however
he said that Mr. Howe had installed a
mainline which could supply water
to handlines that could irrigate said lands.

He felt that Mr Howe probably did
occasionally irrigate these lands and there
fore did not have any objection to
including the lands on the water right.

FROM: Jim
RE: 29-7317

Mr Howe called in reference to my letter of 5-6-83.

He felt that more acres should included on the license because not all of his land was being irrigated when the field exam was made.

He explained that two fields located east of the lands being irrigated were in summer fallow the year that the field exam was made.

✓ The fields in question are 14.2 acres and 9.8 acres. located in the E $\frac{1}{2}$ of the ~~East~~ ^{SE} ~~Quarter~~ ^{and SW $\frac{1}{4}$ NE $\frac{1}{4}$} See 11.

- See aerial photo attached to the field exam.-

He has a mainline running east from the North South main line to serve these lands.- This mainline is shown on the field exam. aerial photo

Mr. Howe further explained that these lands were hard to irrigated and did not have very good soil. He mainly used the land to grow winter wheat and pasture

He only irrigates once or twice a year when he grows ~~ask~~ winter wheat. This year ^{he} is growing rye and does not plan to irrigate this ground. However next year he plans to grow winter wheat again.

He admits that he does not irrigate this land very much but feels that it should be included on the license.

The amount of water diverted under the right should not be changed because he said that he does not use more than 3 band lines.

Pursuant to Mr. Howe's call I am inclined to allow the additional land w/o requiring another field exam.

If you concur I will document the changes on the field exam and license.
