Dear Mr. Muller:

Thank-you for your prompt response to our correspondence of 9/11/89. The reason we did not include the travel trailer is because the permit you were issued did not include more than one domestic use. Therefore, the Department cannot issue the license for more than one unit.

If you desire to include the second unit, you should file another application for water permit.

If you have any questions, please feel free to contact us.

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = (.29)(3.5) = 1.02$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = (.04)(245)(1.9835) = 19.44$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 1.02$$

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing

MICROFILMED

OCT 11 1989

of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

Re: Permit No. 29-7207

Arthur H. Muller
Box 337
Lava Hot Springs, ID 83246

Dear Mr. Muller:

Your March 26th letter raised an important question concerning the distance required between your well and any neighboring wells that might be drilled.

The required distance depends somewhat upon the aquifer system into which the wells are drilled. If the wells are located too closely, then interference will occur because a cone of depression is created when the wells are pumped. Your permit does not require that wells drilled later in time be a certain distance from your well, but your permit does give you a better water right than any wells which applications are filed later than yours, and therefore, when the water level reaches a reasonable pumping level and a critical groundwater area is established, then the newest rights will be shut off first.

You also asked about requirements for making final proof of beneficial use on your permit. Your permit was issued to allow you to develop the project during a five year period which ends August 1, 1979. Following that date, or upon the completion of your project whichever comes first, a proof of beneficial use affidavit should be filed to indicate that the project is completed. A field examination is then made by someone from the Department and a final water right license is issued for the beneficial use of water that is found. A proof of beneficial use form is enclosed for your use if your project is completed. Enclosed also is a water users handbook which contains additional information concerning both of these matters. If you have any questions, please do not hesitate to contact us.

Gentlemen,

Regarding the above Ref. Permit No. 29-7207, please advise my rights assuming the immediate surrounding area of land were to be sold as a lump acreage, or subdivision lots? Can you quote to what distance my permit will protect me from other interests from drilling wells for their usage? (In my immediate vicinity)

Additionally, I question the need and requirements for re-application of water rights at the end of the current five year permit. What requisites are necessary?

To further enhance my knowledge of the water rights for the State of Idaho land owner, do you print a brochure or manual which I could have.

Thanks for your help.
