Gentlemen:

There is some confusion on my part as to who is qualified to measure water. My attorney suggested that I relate this to you in hopes that you would be so good as to give me an indication as to who is qualified and what qualifies him and who determines that he is qualified

Your correspondence on the matter has given me no indication as to who this might be. I have looked in the telephone book to see if I could find such an animal listed as a measurer of water and haven't found any. At any rate I cannot complete your form if I don't know who can measure water. I hope you can give me a clue as to who this might be.

Regards,

Jeff Webster

Dear Mr. & Mrs. Webster:

One of the conditions of approval of your water Permit No. 29-7109 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before March 1, 1975. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Gentlemen:

In reference to your request of Dec. 31, 1973 for filling out the form Proof of Benifical Use in relationship to my water permit No. 29-7109 I would like to ask for an extension for the reason given below. Section 42-204 Idaho Code amended

The present pump in my well is not capable of handling 37gpm it will only pump about 15gpm.

The location of the well coupled with the adverse weather conditions will not permit us to install a 2hp pump necessary for pumping the required water.

We will have to wait for warmer weather for its instalation.

Whwn we get the larger pump in what is necessary for and accurate measurment. Should I use a stopwatch and a 5gal bucket at the outlet pipe?

Sincerley,

Jeffrey L. Webster
