MEMORANDUM

TO: File 29-7083

FROM: Jim Johnson

DATE: July 25, 1985

RE: Land Ownership of W $\frac{1}{2}$ W $\frac{1}{2}$ NE $\frac{1}{4}$, Sec. 7, Twp 12S, Rge 37E

During the review of transfer application #3078, a routine check was made of ownership of lands where water, via the transfer, was being removed from and it was discovered that the applicant did not own, never had owned, land in the W $\frac{1}{2}$ W $\frac{1}{2}$ NE $\frac{1}{4}$, Sec. 7, Twp 12S, Rge 37E.

The error apparently was made when the original permit holder, Murrell Bigler, filed the application for permit. The map shown on the permit clearly shows that land in the W $\frac{1}{2}$ W $\frac{1}{2}$ NE $\frac{1}{4}$, Sec. 7 was the land to be irrigated under the permit. Unfortunately, Mr. Bigler did not own this land and should have caught his mistake but didn't.

The proof to beneficial use document appears to be typed by the Department's regional office (blue typing ribbon - used by the regions) which simply used the information on the permit.

The field exam was conducted on 7/24/78 and the place of use determination shown by the examiner was apparently influenced also by the map drawn on the permit because the map drawn by the field examiner duplicated the location and acres shown on the permit.

An aerial photo located in the file, apparently from a later attempt to re-examine the permit (see file for more detail) has the data shown on the top right hand corner as "no access port 5/30/79".

A review of this aerial photo and the U.S.G.S. map showing the true size of Sec. 7 revealed that:

- 1) the section corners are wrongly located on the aerial photo
- 2) Lot 1 (NW $\frac{1}{4}$ NW $\frac{1}{4}$) contains 55.97 acres, Lot 2 (SW $\frac{1}{4}$ NW $\frac{1}{4}$) contains 56.06 acres

Using information from a U.S.G.S. map, the section corners of Sec. 7 were corrected, Lots 1 & 2 and the E $\frac{1}{2}$ NW $\frac{1}{4}$ were drawn in.

It can be clearly seen that the lands found irrigated by the field examiner are all located within the NW $\frac{1}{4}$, Sec. 7 and the S $\frac{1}{2}$ SE $\frac{1}{4}$, SE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 6.

The transfer proposes to remove the water right from the NW $\frac{1}{4}$, Sec. 7 and only have it apply to the 73 acres in Sec. 6. Since it can be shown that the water is only being removed from the NW $\frac{1}{4}$, which is land owned by the applicant, the transfer can be approved.

Dear Brad,

I have received the Randy Jones transfer and there is one more item I will need to complete my initial review. Line 2 of the application requests a copy of last years tax notice for all the property involved in the transfer. This would include the acreage south and north of the well that has been irrigated and listed on the old license transfer application.

I would appreciate your assistance.

Dear Mr. Jones:

Our office acknowledges receipt of Assignment of Permit for the above referenced water right. However, in reviewing the file I find that the Permit has been licensed.

In Idaho, a licensed water right is considered real property and can be aquired when the property to which it is appurtenant to is purchased. Proof to owning the water right is proof of owning the property.

Therefore, I have put the Assignment of Permit into the file for future reference only and no other action will be taken.

Permitholder requested that I hold the exam until next year so that he could overhaul his pump. On July 1, 1979 Maile Bigler called the Idaho Falls office and stated that the system would be ready to examine in 30 days. He lives in Utah and his phone number is 801-876-3262. I attempted to complete the exam on 7-24-79, however the system was turned off temporarily for haying. If we are unable to complete the exam this year we should send the 1978 exam to Boise. When the permitholder receives the form letter containing the measurement from Boise, he will have ten days to request

RE: Permit No. 29-7083 BIGLER

Mr. Murrell Bigler
Downey, Idaho 83234

Dear Mr. Bigler:

Personnel from this office have attempted to complete the field examination necessary to finalize the water permit and collect data required for the licensing of your well.

A measuring device of a type approved by this Department has not been installed at the point of diversion, and because of this non-compliance the priority date that you have established for this ground-water source may be in jeopardy.

This office will hold the field report until July 26, 1978. If at that time we have not received notification that the measuring device has been purchased and/or installed, we will forward our findings to the State Office for final action. If the measuring device has been installed, please contact me to set up an appointment to do a re-exam.

Compliance with the conditions on your permit is the only way a license can be issued pursuant to the Idaho Code for your water right development and the land included under the above referenced permit.

Very truly yours,
