WATER RIGHT LICENSE

License of Water Right No. 29-7064 Priority April 21, 1971 Amount 0.44 cfs

THIS IS TO CERTIFY, that Eli Taysom
of Pocatello, Idaho, has complied with the terms and conditions of Permit
No. 29-7064 issued pursuant to Application for Permit dated April 21, 1971,
and has submitted proof to the Department of Water Resources on August 2, 1976,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 0.44 cfs of water from Portneuf River,
tributary to SNAKE RIVER, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Irrigation	from <u>April 1</u> to <u>November 1</u>	at <u>0.44</u> cfs and	<u>186.8</u> acre feet
	from _____ to _____	_____ cfs and	_____
	from _____ to _____	_____ cfs and	_____

(both dates inclusive)

Subject, however, to the condition that no more than 0.44 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
186.8 acre feet per year, said waters to be diverted within the SW $\frac{1}{4}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$ SE $\frac{1}{4}$, Section

Use of water under this license is subject to control by the watermaster of
State Water District No. 29, Portneuf River.
This right when combined with all other rights shall provide no more than 0.02
cfs per acre nor more than 3.5 afa per acre for the lands above.

NOTE: Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho
Code, or the applicable Idaho Law. This right may be forfeited by five years of non-use.

The right to the use of the water hereby confirmed is restricted and appurtenant to the lands or place of use
hereby described, as provided by the laws of Idaho.

10. Remarks The waste surplus and high water right from Quinn Creek is depleted early in the season. Due to the hilly condition of the land it is not possible to get the water from Robbers Roost Creek to the area watered by Quinn Creek, also the land is quite steep in areas causing a great deal of erosion in trying to flood irrigate.

For these reasons I desire a permit to pump water from the Portneuf River to supplement my present available water and by using it for sprinkle irrigation I can increase my production and eliminate some of my erosion problems.

By using a portable sprinkler pump & pipe the installation and operation would be simple and flexible.

Dear Mr. Taysom:

A representative of this Department made an examination of the works covered by your Permit No. 29-7064 and has found the following:

Amount of water that can be recognized as beneficially used under Idaho law: **0.44 cfs** Source: **Portneuf River**

The maximum quantity diverted shall not exceed **186.8** acre feet per year.

Point of diversion: **SW $\frac{1}{4}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 26, Twp. 8S, Rge. 36E, Bannock County**

Beneficial use: **Irrigation of 70 acres within the W $\frac{1}{2}$ NE $\frac{1}{4}$, SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 26, Twp. 8S, Rge. 36E**

Priority date established: **April 21, 1971**

In order for the Department to issue the above license, it will be necessary for you to amend the permit to correspond with the findings of the field examiner. We are enclosing a partially completed amendment form for your use in this matter.

Please sign the amendment application and return it to this office along with a \$20.00 filing fee within 30 days in order that we might issue your license as set forth above. If you do not concur with these findings or have any questions, please contact us within the 30-day period.

SYSTEM DESCRIPTION:

Surface water is diverted from the Portneuf River by a 20 H.P. white 2-cylinder diesel pump motor - no I.D. and by a (Cornell) centrifugal pump - 3RRHFG S/N - 11520. Acreage irrigated by 2-1/4 in. lateral handline sprinklers - 4" diam portable aluminum main. The entire system is portable. Two small excavations have been made near the bank of the Portneuf river where the portable pump and motor can be situated. Therefore 2 separate points of diversion are used to irrigate the land.

REMARKS: System shown operated and described by Elmer Taylor. Portneuf river water is diverted after the permit holder's deeded right on Robber's Roost is shut off.

Dear Mr. Crump:

One of the conditions of approval of your water Permit No. 29-7064 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before AUGUST 1, 1976. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr. Crump:

Enclosed is a copy of your approved Application for Permit No. 29-7064. Please notice the conditions of approval listed on page four requiring the installation of a measuring device. We are enclosing a letter describing the different types of measuring devices accepted by this office. Also, this permit is subject to all prior water rights.

In this particular area of the Portneuf River, water will only be available during the early Spring or during high water. The water from the Portneuf River is also regulated by a water master and, therefore, the water under this particular right will be subject to his control.

If you have any questions regarding this matter, please let us know.

Very truly yours,

BOBBY D. FLEENOR
Assistant Director

Re: Application for Permit No. 29-7064

Mr. Lynn M. Crump
Route #1
McCammon, Idaho 83250

Dear Mr. Crump:

In reviewing your application, it is known that you have requested 2 cubic feet per second or 100 miner's inches for the irrigation of 70 acres of ground. You should be advised that Idaho's Statutes prevent the Department from approving permits for more than one inch per irrigated acre, unless sufficient justification can be submitted to the Director of the Department that will justify a quantity greater than this amount. Since Statutes limit our approval for your 70 acres to 1.40 cubic feet per second, we would request that you review your proposal and either submit additional information during the processing period or advise us as to any necessary changes on your application.

Your assistance in clarifying this issue is appreciated.

Dear Mr. Crump:

We are in receipt of your application for permit and it would appear to be in order; however, we wish to advise you that the quantity of water requested appears to be somewhat excessive. Under normal conditions, the maximum quantity that we could approve for appropriation would be one (1) inch or .02 cubic feet per second per irrigated acre. Unless you can submit additional justification within the next 2 weeks, we will process the application for 1.4 cfs instead of the 2 cfs that you have requested.

If you should have any further questions in reference to this matter, please advise.
