WATER RIGHT LICENSE

License of Water Right No. 29-7028 Priority March 24, 1969 Amount 1.0 cfs

THIS IS TO CERTIFY, that JOHN C. WHITE
of Bancroft, Idaho, has complied with the terms and conditions of Permit
No. 29-7028 issued pursuant to Application for Permit dated March 24, 1969,
and has submitted proof to the Department of Water Resources on July 1, 1974,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 1.04 cfs of water from King Creek,
tributary to the Portneuf River, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
<u>Irrigation</u>	from <u>April 15</u> to <u>Nov. 15</u>	at <u>1.0</u> cfs and	<u>424 acre feet or</u>
	from <u>to</u>	<u>cfs and</u>	<u>3.5 af per acre</u>
	from <u>to</u>	at <u>cfs and</u>	
(both dates inclusive)			

Subject, however, to the condition that no more than 1.0 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
424 acre feet per year, said waters to be diverted within the SW $\frac{1}{4}$ SW $\frac{1}{4}$ of Sec. 15,
Twp. 7 S, Rge. 38 E, B. M. in the County of Caribou

maintained as part of the diverting works.

NOTE: Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho
Code, or the applicable Idaho Law. This right may be forfeited by five years of non-use.

The right to the use of the water hereby confirmed is restricted and appurtenant to the lands or place of use
herein described, as provided by the laws of Idaho.

Dear Sir,

In reply to your letter dated February 5, 1975, everything seems to be in order except the sub-division in Section 14 of which approximately 16 acres are now being flood irrigated. from King Creek.

✓ The original application named 40 acres in Section 14 as follows:
SW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec 14, T. 7S, R. 38E, which includes the 16 acres now being flooded. We intend to sprinkle irrigate about thirty acres of this forty acres by the additions of another main line.

If it is possible to include this at this time please do this.
If it is not possible finish it as it is now stated. Call me by phone if there is any questions . Phone 648-7772

RE: Permit No. 29-7028

Mr. John C. White
Bancroft,
Idaho 83217

Dear Mr. White:

Your letter of inquiry dated January 24, 1975 on the above referenced permit has been referred to me for response.

In reference to the land in the (SW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 14, T. 7S, R. 38E,) I was under the impression from our first meeting that it could not be irrigated from your ditch and syphon system under this permit. Therefore, I included no acreage in this subdivision.

Irrigated acreage in the other subdivisions was computed as follows:

NE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 23, T. 7S, R. 38E - 10 acres irrigated.
NW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 23, T. 7S, R. 38E - 37 acres irrigated; 3 acres utilized for farmstead and county road right-of-way.
NE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 23, NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 24, T. 7S, R. 38E - 39 acres irrigated in each subdivision; 1 acre for road along the north side.

Although the permit was originally issued for 200 acres, the total I found irrigated by your King Creek syphon system was only 125. I can only recommend for licensing the acreage that can be irrigated by water from the King Creek ditch and syphon system diverted from King Creek in the SW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 15, T. 7S, R. 38E.

Please inform me if this adequately answers your questions, so we may finalize licensing of this permit.

Very truly yours,

John R. Ferebauer

Dear Mr. White:

A representative of this Department has made an examination of the works covered by your Permit No. 29-7028 and has found the following:

Quantity of water diverted: 1.04 cfs Source: King Creek

Amount of water that can be recognized as beneficially used under Idaho law: 1.0 cfs

The maximum quantity diverted shall not exceed 424 acre feet per year.

Beneficial use: For irrigation of 125 acres within the NE¹/₄NE¹/₄, NE¹/₄NW¹/₄, Sec. 23; NW¹/₄NW¹/₄, Sec. 24, Twp. 7S, Rge. 38E

Point of diversion: SW¹/₄SW¹/₄, Sec. 15, Twp. 7S, Rge. 38E, B.M.

Re: Permit No. 29-7028

John C. White
Bancroft,
Idaho 83217

Dear Mr. White:

One of the conditions of approval of your water Permit No. 29-7028 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before July 1, 1974. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Director

Dear Sir,

In February we sent in an application for filing on another foot of King Creek water. The application was sent from Wallace Transducers office in Soda Springs.

It was advertised in the Soda Springs paper but we haven't heard anything about it since.

Please advise what steps to take now.

Gentlemen:

We are in receipt of your letter concerning the above referenced application for permit. In response to your questions, may we offer the following:

The application proposes the diversion of 1 cubic foot per second or 50 miner's inches for agricultural purposes from April 15 to November 15 of each year. This period is a maximum period within which the right proposed under this application can be diverted from King Creek. The beneficial use listed in the application does not necessarily mean the normal operation of the right.

The 50 inches proposed to be diverted under this application does not constitute a decree as referenced in your letter. At best, if a water license is issued in connection with an approved application, then it would constitute prima facie evidence of a water right. You should bear in mind that the application, if approved, will be subject to all prior water rights, and will carry a priority that will not be any earlier than March 24, 1969; therefore, if any water rights exist prior to this date, the only time the applicant, Mr. John C. White, would have the authority to use the water for the agricultural purposes is when the prior existing water rights have been satisfied. If you feel that your water rights will be injured by this application, then you should submit a protest in connection with the application. However, please bear in mind the following items with which the Department evaluates protests:

1. Whether or not the source of water supply is public water and is subject to appropriation.
2. Whether or not there is sufficient water supply at anytime during

29-7028

a five (5) year period for this application under its proposed priority.

- C
3. Whether or not the application is made in good faith or for delay or speculative purposes.
 4. Whether or not the applicant possesses sufficient financial resources to complete the project.
 5. Whether or not the lands to be irrigated are covered by a perfected water right which provides 1/50 cubic foot per second of water per irrigated acre and/or 5 acre feet per annum per irrigated acre.

If you

O If you wish to submit a protest on the above items, please submit it promptly to the Department.

Mr. Mike W. Hatch, President
King Creek Grazing Association, Inc.
Bancroft, Idaho 83217

Dear Mr. Hatch:

In reply to your letter dated April 26, 1969, Permit No. 29-7028 would not prevent livestock from watering along the creek, regardless of the flow.

The decreed water within Water District No. 17 is under the jurisdiction of the watermaster during the times when regulation is necessary. These permit rights are subject to other water rights and given water according to priority date. If the irrigation season in this application extends beyond the normal period, it is possible the applicant, John C. White may be taking into consideration any dry years that may occur in the future.

If you have any further questions, please advise.

Very truly yours,

ROBERT W. HAMILTON
Supervisor of Water Distribution
