Gentlemen:

One of the conditions of the approval of your Permit No. G-32679/29-2515 was that proof of application of the water to beneficial use be submitted to this office on or before January 10, 1971.

Enclosed is an affidavit form which must be used to submit proof of beneficial use. You may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended.

Either the proof affidavit or a request for extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Power County Implement and Bowler Ranches, Inc.
American Falls,
Idaho 83211

Gentlemen:

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof and relieve the permit holder from making separate proofs of completion of works and beneficial use of water.

The enclosed order modifies your permit to comply with these rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a paper as prescribed by the Department; previously, a permit holder had to publish a notice for four weeks when he submitted proof under his permit.

If you will complete the enclosed forms, we will cause the notice to be published. Should you require additional forms or information, we will be glad to supply them upon request at any time.

Very truly yours,

Donald W. McEldowney

Dear Mr. Bowler:

Thank you for your letter of April 4, 1968. Pursuant to your request we are enclosing an amendment form. Please be advised that when submitted, the application must be accompanied by a \$5.00 application fee.

The only new procedure we have concerning amendments is that an amendment to a permit, such as a point of diversion amendment, changes the entire point of diversion. Therefore, your amendment must include all of the wells that you intend to use to irrigate your 160 acres.

If you have any questions on the matter, please feel free to contact us.

The two wells we drilled last year went dry in August and would not produce sufficient water for the 160 acres ~~where~~ we were irrigating. We moved north $\frac{1}{2}$ mile from Well #2 and have commenced drilling another well. I presume that we will now need another amendment application. If you have these application blanks would you kindly forward some to me and also any instructions as to filing procedures on this third well.

Re: Well Permit No. G032679, January 5, 1966.

For your information: We drilled a well to 700 ft depth and found water sufficient to produce a volume of 700 gallons per minute. However, there is no water below the 320 ft depth. Water in the well stands at 150 ft and draws down to 250 ft. The formation below 320 ft runs from soft red clay to hard blue clay to the 700 ft.

Since this limited volume was not sufficient to water 160 acres of farm land we moved 100 ft direct north of the above well and drilled another. After testing we found nearly the same volume from the second well so we have now hooked both wells together to produce the desired quantity of water.

TO ALL PERMIT HOLDERS:

Well logs are an important part of your recorded water right and State Statutes require that well drillers supply logs on all wells, whether irrigation, domestic, drain or stock wells, to be filed in the Department of Reclamation. In view of the rapidly increasing demand for ground water, the lowering of the ground water level, and the creation of critical ground water areas, it is important that you, as owner, make sure a log on your well is filed in this office. See Idaho Code 42-238.

Very truly yours,

CARL E. TAPPAN
State Reclamation Engineer

RE: Application for Permit

Mack Bowler
American Falls, Idaho

Dear Mr. Bowler:

Returned herewith is the application for permit received without the \$5.75 filing fee for 3.2 cubic feet per second.

There are a few changes or additions to the form. The time under 10 has been changed to 5 years, however, you can make the necessary proofs of completion and use of the water at any prior time.

Kindly check other changes, correct as necessary and return the application with the proper filing fee as shown on the 4th page of the application.

Very truly yours,

RALPH W. THOMAS, Deputy
State Reclamation Engineer
