Gentlemen:

A representative from this department has made an examination of your works covered by Permit 29-2499. The works were found capable of producing 4.1 c.f.s. of which 4.1 c.f.s. can be recognized as beneficially used and licensed under Idaho law. The water is used for municipal purposes for the City of Pocatello.

If you disagree with the findings, please advise us within 10 days; otherwise, a license will be issued showing the findings as set forth in this letter.

Dear Mr. McEldowney:

At the time that the field examination was made by your representative an oriface plate with an oriface size of 8.76" was in use. It was not recording the amount of water that the pump was designed to produce. After several checks and tests were made we found that the orifice size for the meter we were using should be 8.066".

At the time of the field examination the new oriface was on order. The new oriface was installed on November 4, 1969. Enclosed you will find recorder charts showing flow on old oriface and flow on new oriface.

I trust that this information is sufficient for the issuing of a license for Permit #G-32175.

Gentlemen:

In reviewing the Report of the Field Examiner, I find that some additional information is required before a Water License may be issued.

I need to determine the volume of water used annually by your city, both from the well specified on the above referenced permit and all other wells used by the city. Please inform me as to the number of water users and the total number of people served. Also, please provide a listing of water used by any large water users, stating the annual use and the months used (a monthly breakdown if there is much variation). We must, also, have the amount used for irrigation of parks and public lands.

If recorded data is not available, estimates of the volume of water used each month will suffice. If estimates are submitted, please state your method of arriving at these estimates. Also, provide any facts and figures that would help to substantiate these estimates.

If you will provide this information, we shall continue to process your permit. If we can be of any assistance, please advise.

O
Gentlemen:

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof.

P
The enclosed order modifies your permit to comply with these rules and regulations.

Y
One of the conditions of the approval of permit 32175 was that proof of beneficial use be submitted to this office on or before January 21, 1970. The Department will notify you and send forms for making proof of beneficial use sixty days in advance of this date. We wish to advise you, however, that if you have fulfilled the requirements under the permit, you may submit proof anytime prior to the above mentioned date.

If we may be of service at any time, please advise.
