Enclosed are Certificates of Completion of Work and License and Certificate of Water Right, together with departmental receipt No. G-8812, in the amount of \$13.00.

The amount of water allowed on the certificates of water right is the amount of water used beneficially through the sprinkler system.

Dear Mr. Tappan:

Enclosed herein is my check in the amount of \$13.00 requested in your letter of July 27. I understand that this will result in the issuance of a Certificate of Completion and the license and certificate of water right; however, there is one question I do not recall exactly, but it seems that we made the initial file for 200 minor's inches of water instead of the 125 inches listed in your letter of July 27. We would appreciate an explanation as to the reduction in the amount of water claimed.

Very truly yours,

Gentlemen:

Some time ago I filed two permits to appropriate under ground water for and on behalf of my father. upon receiving the approval of these permits together with the permit numbers, I gave the application to my father. He has now misplaced these applications and we have no way of knowing when to make proof of completion of the works. If possible, I would appreciate receiving a copy of the application made by Howard L. Armstrong for underground water in the area of Robin, Idaho. My father made application of other lands in Pocatello, Idaho at about the same time. We have the permit for this well, therefore, we only need the information on the well in Robin.

Thank you for your cooperation.
