Dear Sir,

Referring to my application for permit to drill a well - Application Number G. 35 584, and Permit Number G. 27649 - recorded in Book 97 Approved Dec 18 1958.

We contemplate finishing this project sometime after the first of the year.

I have heard so much argument as to how close or how far away the well must be from the bank of a stream. Consequently I would appreciate the Department's opinion or views on this subject.

Dear Mr. O'Malley:

There is no specified distance which must be between a well and any source of surface water.

The water allowed under a permit is only unappropriated water and the well should not affect the water in any surface source or water in any well with a prior right.

Construction of the well and strata encountered would have to be considered in any case.

Dear Sir,

The well as designated by enclosed permit, was completed by Bill Finlay, of Blackfoot on Jan. 26-1963.

Pump was installed a couple of weeks later and has been used extensively to develop the well -

The well produces a bare 18 gallons a minute, which I understand is about 2 inches of water.

This leaves us 5 inches short of the hoped for 7 inches -

We have discussed the desirability of putting down another well.

I assume this would require the filing of another permit -

Will you advise?

Dear Mrs. McKee:

The date for proofs of Completion of Works and Application of water to beneficial use, as set out under terms of Permit No. G- 27649 are due not later than Dec. 13, 1963

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point, or points, of diversion; and the location of use or the lands which are irrigated -- all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.

Dear Mr. O'Malley:

Returned herewith are forms 36, and 11, we received today with form to amend point of diversion.

March 17, 1963, I sent you a form to amend the point of diversion under this permit to include two wells in the SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 30, T. 7 S., R. 35 E. The permit shows only one well.

The location of the points of diversion shown on Forms 36 are much longer than necessary. "Two wells in SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 30, T. 7 S., R. 35 E." is ample. The descriptions are in error in not describing the 1/16 corner as the east 1/16.

Kindly correct the locations of the points of diversion, enclose amendment to the point of diversion with \$1.00 filing fee. The date to make the proofs, shown on Form 36, will have to be advanced one week.

NOTE:

By decision of the Attorney General, it has been ruled that all legal notices relating to proof of completion of works and proof of beneficial use for licensing of public waters for the State of Idaho must have the correct legal description for the point of diversion and lands to be irrigated. Licenses will be bound by the publication. Thus, with this admonition it was felt that real care should be exercised in pinpointing the location of wells on land.

Philips + Philips, Attorneys at law had a letter from the Attorney General's office in regards to locating the points of the wells, hence the longer description.

We feel it could be safer, if, sometime in the future, litigation should develop -

Yours Truly

Mrs H E Fick Klee
