Dear Mr. Guido:

This acknowledges receipt of the depositions of Holder and two witnesses together with your personal check for \$10.00, also, the affidavit of publication in Intermountain and Alameda Enterprise in proof of Completion of Works and Beneficial Use under Permit No. G-26735.

Before final action is taken the law requires that a field examination be made by an engineer from this department. We cannot say just when this examination will be made but our field engineer will contact you prior to the time he is to make the examination so that you can arrange to accompany him.

We herewith return your check for \$10.00 as the final certificates will not be issued until after the examination is made. After which, we will notify you of the report of the engineer and of the fee in connection with the certificates.

Dear Mrs. Lore:

In reference to your letter of September 23, 1957 stating that you have helped Mr. and Mrs. Sam Guido fill out their permit forms to cover a well they have had drilled and used on their acreage for a number of years.

You request information as to procedure as to how the applicants will require a license with a priority date on the water produced from their well. We wish to state "and we quote," Permit is not an appropriation of the public waters of State, but is the consent of State giving in manner provided by law to construct and acquire real property. Permit gives applicant an inchoate right which will ripen into a legal and complete appropriation only upon completion of works and application of water to a beneficial use. The granting of a permit secures no rights to holder but of compliance with the conditions of permit initiates rights to use water, which right becomes vested and dates back to the issuance of the permit".

Mr. & Mrs. Guido filed an application for permit in this department as of January 31, 1957. Upon the approval of said permit, it was stated under the terms of the permit that completion of works and application of water to beneficial use proofs would be due on February 8, 1959. This gives the applicant two years in which to make their final proof.

It is the usual custom of this department, two months prior to time set for the date of proof, to instruct the applicant by mail that their proofs are due at a certain time and that completion of works and beneficial use proof must be made on a certain date. However, if the works are completed according to the terms of the permit and the water applied to beneficial use, these proofs can be made at any time prior to the due date upon request of the applicant.

September 27, 1957

We are enclosing herewith, a form letter giving instructions how to proceed. We will, for your information, enclose the forms that should be filled out and sent back to this department. We wish to make it clear that it is not necessary for the applicants to make proof at this time, but if they wish to do so, you may fill out the enclosed forms and return to this department, as per instructions enclosed. After the forms enclosed herewith are fully filled out, and returned to this department, the department will then send the publication notice to the paper of which you authorized its publication and request that they publish same for four weekly issues in their paper.

Upon receipt of these publication notices, we then send to the applicant deposition forms to be filled out, one by the applicant and one for each of two witnesses. After this department receives the depositions fully filled out and signed before a notary by the applicant and the two witnesses, we then send an engineer to inspect the well and the place of use to measure the well and see what the well is pumping and to determine the number of acres to be irrigated and the amount of water applied to beneficial use. After the engineer's inspection report is received in this department, then upon a payment of a fee of five dollars for completion of works and also a fee of five dollars for the recording of beneficial use, a license will then be issued by the State which is a perpetual right as long as the applicants apply the water to beneficial use.

We hope that this will be sufficient explanation for your requirements.

Very truly yours,

MARK R. KULP

Dear Sir:

I clipped the enclosed, NOTICE OF PROOF OF COMPLETION OF WORKS AND APPLICATION OF WATER TO BENEFICIAL USE, from a local paper as we helped Mr. & Mrs. Sam Guido fill out forms to cover a well they have had drilled and used on thieracorage for a number of years. He wanted to establish a priority date for his well.

He made application and has received his form giving him the Permit No. G -----. What we are wondering is how he establishes proof. Does he have to file a notice such as this one in the papers and have it printed a certain number of times?

Any information you can give us as to the finishing of this Permit will be appreciated. If he has to publish such a notice is there any thing else he has to do?

We were wondering if the Permit was all that was necessary. Thank you for any information you may give us on this matter.

Yours very truly,

Mrs. Della Lore

Please return the clipping
so we may use it for a reference.

Mr. Guido contacted a local attorney here in Pocatello and he could not tell him the procedure as he had never handeled such a matter.

Dear Mr. and Mrs. Guido:

In reply to your letter of January 24, 1957, we enclose a form of application for permit to appropriate subterranean water from a well together with a pamphlet giving regulations and instructions in regard to filing same.

When this application is approved, it will be signed by the proper State Officials and sent you as a use permit under which you may proceed with the construction of the work described in the application.

In order to complete your water right, proofs of Completion of works and application of the water to beneficial use are required. The time required for making these proofs should be indicated under Question 10.
