REMARKS: It is proposed to dig this well to provide a source of irrigation water which will supplement the existing water right in the Portneuf-Marsh Valley Canal Co. The well will be dug on land which is under the ownership of the applicant. Present water rights under P.M.V.C.Co are entirely inadequate as they are able to deliver slightly over one-half of water subscribed for. The type of land irrigated needs a large head of water to push over it, as it is near level and of a porous nature.

APPLICATION FOR AMENDMENT TO PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF IDAHO, NO. 21785. Comes now Larry F. Denney, and represents to the State Reclamation Engineer of the State of Idaho. That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho, No. 21785. He requests that the list of lands to be irrigated, as described in said permit, be changed to read as follows: Twp. 11 S. Range 27 E. Sec. 8, a portion of SW1/4 of NW1/4 and a portion of NW1/4 of SW1/4 as indicated in map. Twp. 11 S. Range 27 E. Sec. 7, a portion of SE1/4 of NE1/4 and a portion of SE1/4 of NE1/4 and a portion of SE1/4 of NE1/4 and SW1/4 of NE1/4 as indicated on map, making a total of 150 acres. That an additional amount of water is not asked for, and that the rights of others will not be adversely affected by such change. Signed at 2 p.m. this 24 day of February, 1953. Date of receipt at Office of Department of Reclamation Feb. 25, 1953. APPROVAL OF STATE RECLAMATION ENGINEER I, Mark R. Kulp, State Reclamation Engineer of the State of Idaho, hereby approve the above and foregoing for amendment to Permit to appropriate the Public Waters of the State of Idaho, No. 21785. This approval constitutes an amendment to the original permit, to which it refers, and of which it becomes a part, and is approved only insofar as the rights of others will not be adversely affected thereby. Dear Sirs,

I am in the process of buying the Larry F. Denney farm at Lowry, Idaho. and I understand from him that in order to have the License and certificate of Water right No. 21785 issued to him so that he can transfer it to me. a fee of \$12.00 is due.

on Oct. 1, 1958 a letter was sent to him from your office stating your field engineer had inspected the well and that everything seemed to be in order so I'm enclosing a check for \$12.00
21785 form sent 1-28-64

hoping that you can send the
permit to Larry F. Denny at Denny
Island and then he can transfer it to
me.

Also in a month or so I would like
to file on a additional 3 D.F.S. which
the well is capable of conveying and
I was wondering if you can send me
the papers I'll need and also any more
information to complete it.

Thanks very much

Dear Mr. Nyman:

Mr. Denney was notified by letter dated October 1, 1958, that the Certificate of License of Water Right No. 21785 would be issued for 2.09 c.f.s. from well in NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 8, priority November 13, 1950, for irrigation of 150 acres in SW $\frac{1}{4}$ NW $\frac{1}{4}$, NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 8; S $\frac{1}{2}$ NE $\frac{1}{4}$, N $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 7, T. 11 S., R. 37 E.

The examination of the works was made August 21, 1958.

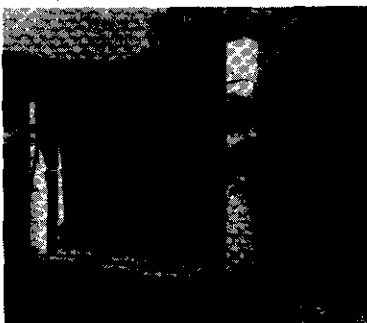

This was a shallow well. Some of the shallow wells have been drilled deeper, some have been abandoned, and some are still being used. I have no information concerning present status of this well.

Gentlemen:

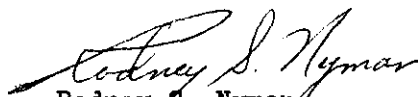

We are wondering if you can give us some information on a pump well used for irrigation and dug and owned by Larry Denney. It is located in the Northwest quarter of the Southwest quarter of Section 8, Township 11 South, Range 37 East of the Boise Meridian. He has Permit No. 21785 for this well.

We are wondering if you could give us the approximate delivery from this well and the probable life of wells of this type in this area.

Thank you for your help in this matter.

Dear Mr. Denney:

Our field engineer's report on his inspection of the beneficial use of water under the terms of Permit No. 21785 shows that the well is capable of conveying 10 $\frac{1}{2}$ miners inches (2.09 c.f.s.) of water for irrigation of 150 acres.

Upon receipt of the statutory fee of \$12.00 (based at the rate of two dollars for each 40-acre subdivision) we will issue the License and Certificate of Water Right confirming the right with priority of November 13, 1950 to the use of 2.09 second feet of subterranean water, with point of diversion in the NW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 8, for irrigation of 150 acres in the SW $\frac{1}{4}$ NW $\frac{1}{4}$, NW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 8, S $\frac{1}{2}$ NE $\frac{1}{4}$, N $\frac{1}{2}$ SE $\frac{1}{4}$ Section 7, Township 11 South, Range 37 East, B.M.

Gentlemen:-

We acknowledge receipt of a copy of the publication of "Notice of Proof Application of Water to Beneficial Use" on Permit No. 21785, in the name of Larry F. Denney. Published in your July 25th issue.

Upon checking, we find an error in paragraph 6, line 1-
reading - "Portion of $SW\frac{1}{2}SE\frac{1}{4}$, $NW\frac{1}{4}$ "
and should read - Portion of $SW\frac{1}{2}SE\frac{1}{4}$ & $NW\frac{1}{4}$

A correction in your subsequent issue will be appreciated

Mr. Larry F. Denney

Dear Mr. Denney:

There is no specific statute as to the lowering of existing springs by irrigation wells, but it is a recognized principle of our water laws that prior rights have superiority over later appropriations and if the withdrawal of water reduces the amount of water available under an existing right and this interference can be proved, I think the courts would recognize the prior right and protect it.

I do not know just what proof would be required, as that would be a matter that the courts would determine.

The distance a well should be from a spring is not the important factor, as a well might be just a few feet from a spring and not affect the flow of the spring and it might affect it from quite a distance. The important consideration is the interference with an existing prior right.

I regret that I can not be more specific.

Dear Mr. Kulp,

In regard to Permit No. 21785, ditches to remaining 80 acres have not been built. However, this is my problem, as my canal water is not dependable I should like to transfer it to some high ground that I own or sell it outright to some one who can get delivery of it. I would like to designate the three second feet of water from well to existing 120 acres that I have irrigated. This water was used this way this year and worked out quite satisfactorily.

Would you please advise me as to how to do it?

Sincerely, Larry Denny

Dear Mr. Denney:

We acknowledge receipt of your proof of completion of works on Permit No. 21785, accompanied by \$5.00 in currency to pay the statutory fee in connection therewith.

We note your statement that the water is not yet available for 80 acres described in said permit.

If the well and pump and ditches are all in place, that is all that will be required in making proof of completion of works, and a longer time can be allowed for making proof of beneficial use after the land has all been irrigated.

However, unless the construction is completed, we suggest that you do not make proof of completion of works at this time, and we shall await your further reply before proceeding to issue Certificate of Completion of Works.

Dear Sir:-

Under the terms of your Permit No. 21785.....you are required to complete your diversion works on or before November 28, 1952..... I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.
