- c. Are you completely abandoning the lands previously irrigated by this right? If not, explain your plan  
No, it will be diverted back from new point of diversion, now and then  
as we rotate the ground irrigated by sprinkling. This is not for expansion  
of acres but to consolidate the water so as to have enough in one diversion  
to take care of the sprinkling system.
- d. Describe any other water rights that you claim for the new ground upon which you wish to transfer the right:

- e. Indicate on the above plat the new land to be irrigated and the point of diversion.

I hereby assert that no one will be injured by such transfer and that the change will be made at my own risk. The information contained in this application is true to the best of my knowledge.
