This topographic map shows a section of land with several owners and features. The map includes contour lines indicating elevation, with labels such as 2000, 2400, and 2600. A prominent feature is a large body of water labeled "CLEAR WATER" and "FORK". The map is divided into several rectangular sections, some of which are labeled with owner names and acreage. The owners and their respective sections are:

- JOHN J. ALTMAN et ux**: 31.25 acres
- C. BRUCE PEEPLES**: 3.4 acres
- FRANK M. SCOTT**: 37.32 acres
- ARDEN L. LYTLE et ux**: 34.25 acres
- LEE C. POTTER et ux**: 3.4 acres
- GERTRUDE LYNN HUN**: 3.4 acres
- DAILEY et ux**: 3.4 acres
- LUCAST et ux**: 3.4 acres
- CAMERON et ux**: 3.4 acres

The map also shows a road labeled "JEBB COM" and a stream labeled "CLEAR WATER". The map is oriented with North at the top. The map is a black and white reproduction of a topographic map.

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Stockwater use is for 6 horses.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 12TH day of JANUARY, 1994.

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before April 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

Re: Water Appropriation Application

Dear Applicants:

The Idaho Department of Water Resources has received your Application For Permit To appropriate The Public Waters Of The State Of Idaho and your filing fee in the amount of \$30.00 for which receipt #N-004295 is enclosed. However I regret to inform you that the application is not acceptable in its present form, so I am returning it to allow you to check the following items that I have taken the liberty changing or completing.

Item #3 and #9: The legal description of the point of diversion must be described by 10 acre parcel (for example ... SE $\frac{1}{4}$ NE $\frac{1}{4}$ SW $\frac{1}{4}$) Section, Township and Range as established by the public land survey. I used the the information on item #13 to complete items #3 and #9.

Item #4: A diversion rate of 0.20 cfs (approximately 90 gal/minute) is considered to be an excessive diversion rate for 100 head of stock, 0.02 cfs (approximately 14 gal/minute) is recognized as being sufficient for up to ten head of stock. You may file for more than this amount for stock watering purposes if you wish, but it may not be approved unless you provide evidence that the excess water is needed.

Item #7: This item must indicate the length of time you need to complete the entire project and put the water to a beneficial use. I assumed that the spring has already been developed, so I only applied for one year for completion of the project.

The Application must be checked, completed and returned to this office with any other information you deem appropriate within 30 days of the above date. Failure to communicate with this office within that time may result in the voiding of your application.
