ENCLOSURE

MEMORANDUM

TO: File 82-7083

FROM: Jim Johnson *JS*

DATE: May 1, 1984

RE: Licensing of Right 82-7083

A second review of water developed under this permit was made based upon the information of the diversion system provided by Dave Paisley.

Amount of Water Diverted:

A. Industrial Use: 3 10HP motors @ $Q = 0.28$ per pump = 0.84 cfs
permit requested 0.75 cfs

B. Fire Protection: Schematic shows one 10HP to supply pond which is a storage pond for fire protection: system to storage pond does not appear to be pressurized: $Q = \frac{10(8.8).80}{20} = 3.52$ cfs

Permit requests 1.0 cfs for fire protection and diversion to storage.

Tom King, the field examiner, was called and the system as described was discussed with him. He concurred with using the quantities from the pumps when combined and with the capability of the sytem to divert directly to the fire protection storage pond rather than first going through the boiler as shown on his schematic. He did not recall there being 4 10HP pumps and motors.

Since 3 pump and motors found are capable of producing the amount of water requested, the permit consideration of the 4th pump is non-applicable.

The license should be issued as follows:

0.75 cfs Industrial	543.0 acre feet
1.0 cfs Fire Protection	n/a (acre feet)
1.0 Diversion to Storage	n/a (acre feet)
Storage for Fire Protection	0.60 acre feet

If you will not be available to show the system, please provide this office with the name and address of someone who will be able to do so. Your permit will remain valid until the examination is made.
